The Study of Communication Networks and Communication Structure in Large Organizations Peter R. Monge, 1974 Communication networks consist of the regular patterns of interpersonal communication contacts which develop among people within an organization as they use various forms of communication face to face meetings memos telephone calls etc to accomplish the daily activities of an organization Information regarding the functioning of the various types of human networks is important since it can be used to understand the organizational process and to assess its effectiveness and efficiency The report describes a set of procedures for analyzing these networks in large organizations These include 1 identification and evaluation of various kinds of networks 2 assessment of the organizational hierarchy 3 appraisal of various departments within the organization and 4 evaluation of individual communication behavior Modified author abstract

Communication Networks Jean Walrand, Shyam Parekh, 2017-12-04 This book results from many years of teaching an upper division course on communication networks in the EECS department at the University of California Berkeley It is motivated by the perceived need for an easily accessible textbook that puts emphasis on the core concepts behind current and next generation networks After an overview of how today's Internet works and a discussion of the main principles behind its architecture we discuss the key ideas behind Ethernet WiFi networks routing internetworking and TCP To make the book as self contained as possible brief discussions of probability and Markov chain concepts are included in the appendices This is followed by a brief discussion of mathematical models that provide insight into the operations of network protocols Next the main ideas behind the new generation of wireless networks based on LTE and the notion of QoS are presented A concise discussion of the physical layer technologies underlying various networks is also included Finally a sampling of topics is presented that may have significant influence on the future evolution of networks including overlay networks like content delivery and peer to peer networks sensor networks distributed algorithms Byzantine agreement source compression SDN and NFV and Internet of Things
