Pearse, 2011-09-15 Forestry cannot be isolated from the forces that drive all economic activity It involves using land labour and capital to produce goods and services from forests while economics helps in understanding how this can be done in ways that will best meet the needs of people Therefore a firm grounding in economics is integral to sound forestry policies and practices This book a major revision and expansion of Peter H Pearse s 1990 classic provides this grounding Updated and enhanced with advanced empirical presentation of materials it covers the basic economic principles and concepts and their application to modern forest management and policy issues Forest Economics draws on the strengths of two of the field s leading practitioners who have more than fifty years of combined experience in teaching forest economics in the United States and Canada Its comprehensive and systematic analysis of forest issues makes it an indispensable resource for students and practitioners of forest management natural resource conservation and environmental studies **Tourism And China's Development- Policies, Regional Economic Growth & Ecotourism** Clement A Tisdell, Julie Jie Wen, 2001-03-15 China s continuing economic reforms since 1978 have substantially altered its economic structure expanding the service sector including the tourist industry The reforms have resulted in spectacular economic growth and a boom in tourism development But China s economic growth has been very uneven regionally and has been cause for political concern The ability of tourism to counteract this uneven development and promote regionally decentralised development is therefore of special interest as is the sustainability of regional tourism which often depends on nature conservation and the presence of minority cultures This book addresses all those issues Although focussed on China it deals with issues such as those involving the sustainability of tourism and convergence and divergence in regional tourism
