The Future of Work in Developing Countries
Akbar Noman, Joseph E. Stiglitz, Arjun Jayadev, 2026-03-03 One of the most pressing issues in development today is the employment challenge in low and middle income countries As more young people enter the labor force and as structural transformation unfolds amid deindustrialization technological disruption and global competition the question of how to create sufficient decent jobs has become central to the economic future of the Global South Although this is a shared challenge across developing regions it is particularly acute in Africa where rapid demographic change and urbanization are colliding with limited industrial expansion Bringing together leading international scholars *The Future of Work in Developing Countries* examines the employment problem from multiple perspectives Early chapters develop conceptual frameworks around corporations and the global hierarchy of production Subsequent contributions investigate the dynamics of structural transformation the role of firms in linking production and labor to surplus and the design of industrial and technology policies Later chapters turn to detailed case studies especially from Africa that illustrate the possibilities and limits of different growth paths and comparative insights from Asia and Latin America provide further perspective By combining rigorous theoretical analysis with grounded empirical research this book demonstrates that employment creation is not an automatic byproduct of growth but a political and institutional project It offers fresh insights for scholars of development political economy and economic history as well as for policy makers seeking strategies to promote inclusive transformation in Africa and beyond

Industry 5.0: The Human-Centric Future of Industry
Muhammad Hammad, Hassan Ali, Ghulam Hussain, Xiaoping Wang, 2026-01-01 This book provides a detailed and insightful exploration of the next stage in industrial evolution focusing on the integration of advanced technologies with human centered values Unlike the previous phases of industrial revolutions Industry 5.0 emphasizes the collaboration between humans and machines where technology serves to complement and enhance human capabilities rather than replace them This book highlights the key technologies that are shaping the future of industry such as collaborative robots cobots artificial intelligence digital twins and the Internet of Things IoT These innovations are examined through practical case studies across various sectors including manufacturing healthcare agriculture and smart cities demonstrating their transformative effects on productivity sustainability and workforce development A unique feature of this book is its strong focus on the human aspect of Industry 5.0 addressing the need for upskilling and reskilling the workforce ensuring workplace safety and promoting ethical considerations in technology design It also explores the growing importance of sustainability with discussions on circular economic practices and strategies to reduce environmental impact This book serves as an essential resource for business leaders policymakers

and educators looking to understand and navigate the challenges and opportunities posed by Industry 5.0 equipping readers with the tools to lead industries into a more sustainable and human centered future
