Walmsley, 2021-10 *Live Like a Hunter Gatherer* is an informative and immersive guide to the Stone Age written by a real life hunter gatherer. If you imagined that all Stone Age people lived in caves were not very clever not very clean and said Ugg a lot then think again. Marking the start of all human history the Stone Age lasted around 3.5 million years the last part of that was only 71 grandparent's ago. Delve into that incredible time with this book packed full of amazing facts, information, crafts, storytelling and myth debunking to find out what it was really like to live as a hunter gatherer. Many of our Stone Age ancestors' everyday needs were similar to ours: how to keep warm, where to sleep and what to eat and drink. We find out how they met those needs, what a typical day was like, what medicine they used and even how they had fun. All brought to life with beautifully detailed illustrations. Dotted through the book are step by step craft activities and recipes that give you first hand experience of some vital Stone Age skills: making a Mesolithic shelter, fat lamps, a digging stick, creating cave art, making a bow and arrow and a fishing hook are just a few. A fictional tribe member pops up throughout the book to tell us about her life, describing the sights, sounds, smells and emotions she experiences. The safety of a warm cave with flickering firelight and other tribe members nearby, the gnawing feeling of hunger when food is scarce and the excited relief when a deer is hunted.

Multidisciplinary Approaches to the Study of Stone Age Weaponry Radu Iovita, Katsuhiko Sano, 2016-05-28. The objective of this volume is to showcase the contemporary state of research on recognizing and evaluating the performance of stone age weapons from a variety of viewpoints including investigating their cognitive and evolutionary significance. New archaeological finds and experimental studies have helped to bring this subject back to the forefront of human origins research. In the last few years investigations have expanded beyond examining the tools themselves to include studies of damage caused by projectile weapons on animal and hominin bones and skeletal asymmetries in ancient hominin populations. Only recently has there been a growing interest in controlled and replicative experiments. Through this book readers will be updated in the state of knowledge through a multidisciplinary scientific reconstruction of prehistoric weapon use and its implications. Contributions from expert authors are organized into three themed parts: recognizing weapon use, experimental and archaeological studies of impact traces, performance of weapon systems, factors influencing penetration depth etc and behavioral and evolutionary ramifications, cognitive and ecological effects of using different weapons. *Later Stone Age Hunters and Gatherers of the Southern Transvaal* Lyn Wadley, 1978.
