## **Workshop Wisdom:**

**Wisdom's Workshop** James Axtell,2023-03-07 An essential history of the modern research university When universities began in the Middle Ages Pope Gregory IX described them as wisdom s special workshop He could not have foreseen how far these institutions would travel and develop Tracing the eight hundred year evolution of the elite research university from its roots in medieval Europe to its remarkable incarnation today Wisdom s Workshop places this durable institution in sweeping historical perspective In particular James Axtell focuses on the ways that the best American universities took on Continental influences developing into the finest expressions of the modern university and enviable models for kindred institutions worldwide Despite hand wringing reports to the contrary the venerable university continues to renew itself becoming ever more indispensable to society in the United States and beyond Born in Europe the university did not mature in America until the late nineteenth century Once its heirs proliferated from coast to coast their national role expanded greatly during World War II and the Cold War Axtell links the legacies of European universities and Tudor Stuart Oxbridge to nine colonial and hundreds of pre Civil War colleges and delves into how U S universities were shaped by Americans who studied in German universities and adapted their discoveries to domestic conditions and goals The graduate school the PhD and the research imperative became and remain the hallmarks of the American university system and higher education institutions around the globe A rich exploration of the historical lineage of today s research universities Wisdom s Workshop explains the reasons for their ascendancy in America and their continued international preeminence Rationale Management in Software

Engineering Allen H. Dutoit,Raymond McCall,Ivan Mistrik,Barbara Paech,2007-02-02 Thirty years ago I first entered the dark realm of software engineering through a prior interest in documentation In those days documentation pretty much meant functional specifications The idea that stakeholders in a system its implementers its end users its maintainers and so forth might want something other than an alphabetic list of function definitions was just taking hold There was an exciting to me vision of stakeholders accessing and contributing to explanations of how and why aspects of a system work as they do tradeoff analysis of concomitant downsides and perhaps even accounts of why other possible approaches were not followed There were many challenges to overcome in achieving this vision The most formidable is the belief that people do not like to create or use do mentation This negative image of documentation is unfortunately more than just the bias of a few incorrigible system developers It is more like a deep truth about human information behavior about how human beings construe and act towards information Humans are by default active users of information they want to try things out and get things done When documentation is interposed as a prerequisite between people and a desired activity they try to skip through it circumvent it or undermine it Desi ing information to suit the needs and interests of its users is an abiding challenge but we have come a long way from functional specifications as the only answer Boys' Life ,1976-03 Boys Life is the official youth magazine for the Boy Scouts of America Published since 1911 it contains a proven mix of news nature
