**Gender, Technology, and the Future of Work** Mariya Brussevich,Ms.Era Dabla-Norris,Christine Kamunge,Pooja Karnane,Salma Khalid,Ms.Kalpana Kochhar,2018-10-09 New technologies digitalization artificial intelligence and machine learning are changing the way work gets done at an unprecedented rate Helping people adapt to a fast changing world of work and ameliorating its deleterious impacts will be the defining challenge of our time What are the gender implications of this changing nature of work How vulnerable are women s jobs to risk of displacement by technology What policies are needed to ensure that technological change supports a closing and not a widening of gender gaps This SDN finds that women on average perform more routine tasks than men across all sectors and occupations tasks that are most prone to automation Given the current state of technology we estimate that 26 million female jobs in 30 countries 28 OECD member countries Cyprus and Singapore are at a high risk of being displaced by technology i e facing higher than 70 percent likelihood of being automated within the next two decades Female workers face a higher risk of automation compared to male workers 11 percent of the female workforce relative to 9 percent of the male workforce albeit with significant heterogeneity across sectors and countries Less well educated and older female workers aged 40 and above as well as those in low skill clerical service and sales positions are disproportionately exposed to automation Extrapolating our results we find that around 180 million female jobs are at high risk of being displaced globally Policies are needed to endow women with required skills close gender gaps in leadership positions bridge digital gender divide as ongoing digital transformation could confer greater flexibility in work benefiting women ease transitions for older and low skilled female workers

Artificial Intelligence and the Future of Work: Humans in Control Ekkehard Ernst,Janine Berg, Phoebe V. Moore,2024-10-01 Artificial Intelligence AI is rapidly advancing in areas such as pattern detection classification and prediction which were long thought to be the exclusive realm of humans These developments are triggering excitement about the potential of AI but are also raising concerns about possible risks The versatility of AI and its speed of development have led to a wide range of applications both in personal and professional environments The most dramatic effects are however in the world of work AI is impacting job loss and employability and causing a transformation of tasks in a range of occupations and sectors It is also affecting other aspects of the labor market such as recruitment performance monitoring and dismissal As such the development and implementation of AI are raising concerns about the future of work both in terms of its mere existence and quality with critical implications for the social fabric as well as future development prospects

*The Future of Work in the United States* Natalie Rauscher,2021-09-03

This book presents and analyzes how restructuring processes due to technological change are reflected and processed in political and public discourses in the United States in the most recent past. More specifically, this work examines how the themes of automation, digitization, and the platform economy and their impact on the future of work are reflected in public discourse through the analysis of journalistic articles and political discourse through the analysis of congressional hearings. Public and political discourses, as well as economic narratives, shape our understanding of certain developments such as technological change, our behavior more generally, and societal support of said developments. Therefore, it is vital to investigate and analyze these discourses in order to show how technological change is perceived and evaluated today. This work draws from concepts and methods of several different disciplines, most notably using a combination of corpus linguistic methods and exemplary textual analysis. This way, this work stands as truly interdisciplinary with a unique approach to the quantitative and qualitative examination of discourses.

OECD Reviews on Local Job Creation Preparing for the Future of Work Across Australia OECD, 2021-09-24. COVID-19 is likely to leave long-lasting effects on local labour markets. It is accelerating a pre-existing trend towards automation as firms look even more to new technologies to pandemic-proof their operations.

**The Future of Work, Employment and Social Protection** Peter Auer, Bernard Gazier, 2002. This volume comprises the papers and debates of the second France ILO Symposium on the future of work, employment, and social protection. Reflecting the aim of the Symposium itself, the book provides in-depth reflections on work, employment, and social protection. Designed to be more than an account of the discussions, this book is a useful tool for all those interested in labour market transition and the increasing importance of female labour for the future of the labour markets, particularly in the developed world. The book discusses the need for more family-friendly policies and a more radical policy of equality between the sexes. The legal dimensions of labour market change are also debated, and the book explores the positive and negative sides of globalization and its links with technological change.
