Favorskaya, 2020-04-20 This book gathers selected papers presented at the conference Advances in 3D Image and Graphics Representation Analysis Computing and Information Technology one of the first initiatives devoted to the problems of 3D imaging in all contemporary scientific and application areas The aim of the conference was to establish a platform for experts to combine their efforts and share their ideas in the related areas in order to promote and accelerate future development This second volume discusses algorithms and applications focusing mainly on the following topics 3D printing technologies naked dynamic and auxiliary 3D displays VR AR MR devices VR camera technologies microprocessors for 3D data processing advanced 3D computing systems 3D data storage technologies 3D data networks and technologies 3D data intelligent processing 3D data cryptography and security 3D visual quality estimation and measurement and 3D decision support and information systems **Virtual Environments in Clinical Psychology and Neuroscience** Giuseppe Riva, Brenda K. Wiederhold, E. Molinari, 2006-12-15 Virtual Reality VR offers the potential to develop human testing and training environments that allow for the precise control of complex stimulus presentations in which human cognitive and functional performance can be accurately assessed and rehabilitated However basic feasibility and human issues need to be addressed in order for this technology to be reasonably and efficiently applied in clinical psychology The book written in a scholarly style will provide rationales for virtual reality s applicability in clinical psychology We will review the relevant literature regarding theoretical and pragmatic issues for these applications and provide a description of ongoing work developed world wide The topics directly involve critical issues for clinicians designers and users and will be discussed with scientific competence without neglecting clarity and empirical cases with suggestions for actual use The book is divided in three main sections VR in clinical psychology opportunities and challenges VR in treatment of phobias and VR in clinical assessment and therapy **Advances in Visual Computing** George Bebis, Richard Boyle, Bahram Parvin, Darko Koracin, Fowlkes Charless, Wang Sen, Choi Min-Hyung, Stephan Mantler, Jurgen Schulze, Daniel Acevedo, Klaus Mueller, Michael Papka, 2012-08-22 The two volume set LNCS 7431 and 7432 constitutes the refereed proceedings of the 8th International Symposium on Visual Computing ISVC 2012 held in Rethymnon Crete Greece in July 2012 The 68 revised full papers and 35 poster papers presented together with 45 special track papers were carefully reviewed and selected from more than 200 submissions The papers are organized in topical sections Part I LNCS 7431 comprises computational bioimaging computer graphics calibration and 3D vision object recognition illumination modeling and segmentation

visualization 3D mapping modeling and surface reconstruction motion and tracking optimization for vision graphics and medical imaging HCI and recognition Part II LNCS 7432 comprises topics such as unconstrained biometrics advances and trends intelligent environments algorithms and applications applications virtual reality face processing and recognition

A Handbook of Management Theories and Models for Office Environments and Services Rianne Appel-Meulenbroek, Vitalija Danivska, 2021-08-02 Although workplace design and management are gaining more and more attention from modern organizations workplace research is still very fragmented and spread across multiple disciplines in academia There are several books on the market related to workplaces facility management FM and corporate real estate management CREM disciplines but few open up a theoretical and practical discussion across multiple theories from different disciplines Therefore workplace researchers are not aware of all the angles from which workplace management and effects of workplace design on employees has been or could be studied A lot of knowledge is lost between disciplines and sadly many insights do not reach workplace managers in practice Therefore this new book series is started by associate professor Rianne Appel Meulenbroek Eindhoven University of Technology the Netherlands and postdoc researcher Vitalija Danivska Aalto University Finland as editors published by Routledge It is titled *Transdisciplinary Workplace Research and Management* because it bundles important research insights from different disciplinary fields and shows its relevance for both academic workplace research and workplace management in practice The books will address the complexity of the transdisciplinary angle necessary to solve ongoing workplace related issues in practice such as knowledge worker productivity office use and more strategic management In addition the editors work towards further collaboration and integration of the necessary disciplines for further development of the workplace field in research and in practice This book series is relevant for workplace experts both in academia and industry This second book in the series focuses on the role of workplace management in the organization and the tasks that workplace management needs to consider The 18 theories that are presented in this book and applied to workplace research discuss management aspects from the organization s perspective or dive deeper into issues related to people and or building management They all emphasize that workplace management is a complex matter that requires more strategic attention in order to add value for various stakeholders The final chapter of the book describes a first step towards integrating the presented theories into an interdisciplinary framework for developing a grand workplace management theory
