Teaching and Learning in History Ola Hallden, 2012-10-12 Research on history instruction and learning is emerging as an exciting new field of inquiry The editors prepared this volume because the field is at an important moment in its development a stage where there is research of sufficient depth and breadth to warrant a collection of representative pieces The field of research on history teaching and learning connects with both traditional research on social studies and with recent cognitive analyses of domains such as mathematics and physics However the newer research goes beyond these activities as well Where traditional research approaches to social studies instruction and learning have focused on curriculum they have avoided the study of purely disciplinary features the textual components of history and the concomitant demands as well as the nature of

various learners Where recent cognitive analyses of mathematics and physics have dealt with misconceptions and knowledge construction they have avoided topics such as perspective taking interpretation and rhetorical layerings The new work by contrast has been concerned with these issues as well as the careful analyses of the nature of historical tasks and the nature of disciplinary and instructional explanations The lines of research presented in these chapters are both compelling and diverse and include a range of topical questions such as What affects the quality of teaching How are historical documents interpreted in the writing of history How is history explained What are the classroom demands on an elementary school social studies teacher What does text accomplish or fail to accomplish in educational settings How do teachers think about particular topics for history teaching Although much of the research reflects a grounding in or the influence of cognitive psychology not all of it derives from that tradition Traditions of rhetoric curriculum analysis and developmental psychology are also woven throughout the chapters The editors envision this volume as a contribution to educational research in a subject matter and as a tool for practitioners concerned with the improvement of instruction in history They also anticipate that it will contribute to cognitive science

What is History Teaching? Christopher T. Husbands, Chris Husbands, 1996 This book draws together developments in a wide range of fields in academic history in the study of language and in classroom research on pupil learning as the basis for a distinctive approach to the teaching and learning of history in school Chris Husbands analyses four approaches to learning about the past through looking at evidence through the language of the past through story and through the imagination He emphasizes the ways in which pupils and historians structure their own interpretations of history and considers the implications for teachers by examining the ways in which classroom talk writing and assessment can support the development of sophisticated understandings of the past

Long, 2015-07-30 Teaching for Historical Literacy combines the elements of historical literacy into a coherent instructional framework for teachers It identifies the role of historical literacy analyzes its importance in the evolving educational landscape and details the action steps necessary for teachers to implement its principles throughout a unit These steps are drawn from the reflections of real teachers grounded in educational research and consistent with the Common Core State Standards The instructional arc formed by authors Matthew T Downey and Kelly A Long takes teachers from start to finish from managing the prior learning of students to developing their metacognition and creating synthesis at the end of a unit of study It includes introducing topics by creating a conceptual overview helping students collect and analyze evidence and engaging students in multiple kinds of learning including factual procedural conceptual and metacognitive This book is a must have resource for teachers and students of teaching interested in improving their instructional skills building historical literacy and being at the

forefront of the evolving field of history education **Teaching History for the Common Good** Keith C. Barton, Linda S. Levstik, 2004-07-13

In *Teaching History for the Common Good* Barton and Levstik present a clear overview of competing ideas among educators, historians, politicians, and the public about the nature and purpose of teaching history, and they evaluate these debates in light of current research on students' historical thinking. In many cases, disagreements about what should be taught to the nation's children and how it should be presented reflect fundamental differences that will not easily be resolved. A central premise of this book, though, is that systematic theory and research can play an important role in such debates by providing evidence of how students think, how their ideas interact with the information they encounter both in school and out, and how these ideas differ across contexts. Such evidence is needed as an alternative to the untested assumptions that plague so many discussions of history education. The authors review research on students' historical thinking and set it in the theoretical context of mediated action, an approach that calls attention to the concrete actions that people undertake, the human agents responsible for such actions, the cultural tools that aid and constrain them, their purposes, and their social contexts. They explain how this theory allows educators to address the breadth of practices, settings, purposes, and tools that influence students' developing understanding of the past, as well as how it provides an alternative to the academic discipline of history as a way of making decisions about teaching and learning the subject in schools. Beyond simply describing the factors that influence students' thinking, Barton and Levstik evaluate their implications for historical understanding and civic engagement. They base these evaluations not on the disciplinary study of history but on the purpose of social education: preparing students for participation in a pluralist democracy. Their ultimate concern is how history can help citizens engage in collaboration toward the common good.

In *Teaching History for the Common Good*, Barton and Levstik discuss the contribution of theory and research, explain the theory of mediated action, and how it guides their analysis, and describe research on children's and adults' knowledge of and interest in history. They lay out a vision of pluralist participatory democracy and its relationship to the humanistic study of history as a basis for evaluating the perspectives on the past that influence students' learning. They explore four principal stances toward history: identification, analysis, moral response, and exhibition. They review research on the extent to which children and adolescents understand and accept each of these and examine how the stances might contribute to or detract from participation in a pluralist democracy. They address six of the principal tools of history: narrative structure, stories of individual achievement and motivation, national narratives, inquiry, empathy, and perspective taking, and empathy as caring. They review research and conventional wisdom on teachers' knowledge and practice and argue that for teachers to embrace investigative, multi-perspectival approaches to history, they need more than knowledge of content and pedagogy; they need a guiding purpose that can be fulfilled only by these approaches. Preparation for participatory democracy provides such purpose. *Teaching History for the Common Good* is essential reading for history and social studies professionals, researchers, teacher educators, and students, as well as for policymakers, parents,

and members of the general public who are interested in history education or in students thinking and learning about the subject

History Lessons S.G. Grant, 2014-04-04 In this book extended case studies of two veteran teachers and their students are combined with the extant research literature to explore current issues of teaching learning and testing U S history It is among the first to examine these issues together and in interaction While the two teachers share several similarities the teaching practices they construct could not be more different To explore these differences the author asks what their teaching practices look like how their instruction influences their students understandings of history and what role statewide exams play in their classroom decisions *History Lessons Teaching Learning and Testing in U S High School Classrooms* is a major contribution to the emerging body of empirical research in the field of social studies education chiefly in the subject area of history which asks how U S students make sense of history and how teachers construct their classroom practices Three case study chapters are paired with three essay review chapters intended to help readers analyze the cases by looking at them in the context of the current research literature Two concluding chapters extend the cases and analyses the first looks at how and why the teachers profiled in this book construct their individual teaching practices in terms of three distinct but interacting sets of influences personal organizational and policy factors the second explores the prospects for promoting what the author defines as ambitious teaching and learning Many policymakers assume that standards based reforms support the efforts of ambitious teachers but until we better understand how they and the students in their classes think and act that assumption is hollow at best This book is a must have for faculty and students in the field of social studies education and broadly relevant across the fields of curriculum studies and educational policy
