The Quest for the Description of the Law Reidar Edvinsson,2008-09-27 My dissertation for LL.D or J.S.D Att beskriva rätten To Describe Law which was written under my bachelor surname of Andersson was presented for public examination on Nov 4 2004 Since then the text has been developed in two separate directions On the one hand three of the chapters have been made more accessible to students of jurisprudence and have been included in the second edition of the textbook *Rättsfilosofi samhälle och moraliskt genomtänkta* edited by Joakim Nergelius On the other hand the whole dissertation has been revised translated and published as the present book In the time that has passed since my dissertation many things have changed On the personal level my friend and tutor Aleksander Peczenick was sadly taken away from my circle of colleagues In contrast to that sad event I have spent two nine month periods on paternity leave raising my two children Selma and Bernhard This past year I have decided to move from theory to practice and have started working in a court of law During my work on the dissertation I had the opportunity to spend a rewarding term at Rutgers University in Camden NJ visiting Professor Dennis Patterson Since this book is a continuation of that project it feels appropriate to repeat my thanks to Professor Patterson and STINT The Swedish Foundation for International Cooperation in Research and Higher Education for making that visit possible

The Expositor ,1903 *Value Judgement* James Griffin,1998 James Griffin asks how and how much we can improve our ethical standards not lift our behaviour closer to our standards but refine the standards themselves To give an answer to this question it is necessary to answer most of the questions of ethics So Value Judgement includes discussion of what a good life is like where the boundaries of the natural world come how values relate to that world how great human capacities the ones important to ethics are and where moral norms come from Throughout the book the question of what philosophy can contribute to ethics repeatedly arises Philosophical traditions such as most forms of utilitarianism and deontology and virtue ethics are Griffin contends too ambitious Ethics cannot be what philosophers in those traditions expect it to be because agents cannot be what their philosophies need them to be This clear compelling and original account of ethics will be of interest to anyone concerned with thinking about values not only philosophers but legal political and economic theorists as well
