Brown, 2018-09-21 This book honors Naomi Weisstein's foreshortened span of work published from 1964 to 1992 Naomi Weisstein was a pioneer in the areas we now call visual neuroscience visual cognition and cognitive neuroscience Her enthusiastic pursuit of the mind was infectious inspiring many others to take up the challenge Despite her time as an active researcher being cut short Weisstein's impact was far reaching and long lasting and many of her ideas and insights foreshadowed today's active areas of inquiry into the inner workings of the mind Comprising contributions from leading scholars in the field [Pioneer Visual Neuroscience](#) outlines Weisstein's many contributions to the study of visual perception and processing and their effects on the field today This volume will be of interest to anyone interested in visual perception visual cognition and cognitive neuroscience [Visual Neuroscience](#) J. D. Pettigrew, K. J. Sanderson, W. R. hereditary night blindness creating a valuable source of information for researchers and clinicians in the visual neurosciences

The Roots of Visual Awareness C.A. Heywood, A.D. Milner, C. Blakemore, 2003-10-31 The present volume was assembled in honor of Professor Alan Cowey FRS and attempts to embrace his wide range of research interests in visual neuroscience It is divided into four sections The first contains a group of papers dealing with different fundamental aspects of the visual system including the control and monitoring of eye movements The second is concerned with the functional organization of cortical visual areas and their role in visual perception and visually guided action The third addresses issues concerning color and motion perception along with broader questions of visual attention and the effects of selective brain damage on these different aspects of visual experience The fourth and final section of the volume deals explicitly with questions relating to visual awareness with particular emphasis on blindsight a topic on which Alan Cowey has worked extensively in recent years both in humans and in monkeys

The Visual Brain in Action David Milner, Mel Goodale, 2006-10-12 First published in 1995 this book presents a model for understanding the visual processing underlying perception and action proposing a broad distinction within the brain between two kinds of vision conscious perception and unconscious online vision

Pioneer Visual Neuroscience James M. Brown, 2019

Neuroscience Dale Purves, 2008 Created primarily for medical and premedical students Neuroscience emphasizes the structure of the nervous system the correlation of structure and function and the structure function relationships particularly pertinent to the practice of medicine

Neuronal Operations in the Visual Cortex G.A. Orban, 2012-12-06 The invitation by the editors of the series studies of brain function to contribute a monograph on the visual cortex gives me the opportunity to present in a concentrated manner much of the work I have done on the visual cortical areas of cat and monkey However the field of visual cortical physiology is so active and so diverse that the presentation of only my own work would have given a very incomplete view of visual cortical functioning Therefore this monograph also reviews most of the studies carried out on the subject in the last two decades Where possible I have tried not only to describe the cortical machinery but also its possible functional purpose regarding vision In doing this I have expressed my personal views rather than just reviewing the experimental facts Much of the work presented in this monograph has been supported by the National Research Council of Belgium and the Research Council of the Catholic University of Leuven I express my gratitude to them I have enjoyed collaborating in these studies with P O Bishop H Kato H Kennedy K P Hoffmann H Maes J Duysens E Vandebussche and H van der Glas I am much indebted to all those who have commented on earlier versions of this monograph J Allman H Barlow J BuBier M Callens J Duysens O J Griisser P Heggelund H Kennedy L C Orban and L Palmer
