physics are measurable and can therefore be substantiated with objective arguments Yet this does not apply to the unquantifiable aesthetics of architecture Accordingly judgments on aesthetics are always subject specific and strongly dependent on the viewer Nevertheless the aesthetics of architecture is not just a matter of taste Many relationships between buildings as objects and viewers as subjects can be determined objectively with the help of perceptual psychology and information theory as this book demonstrates *Architecture and Visual Perception* Alice Gray Read,Peter C. Sailer,2022-03-22 The Covert Life of Hospital Architecture addresses hospital architecture as a set of interlocked overlapping spatial and social conditions It identifies ways that planned for and latent functions of hospital spaces work jointly to produce desired outcomes such as greater patient safety increased scope for care provider communication and more intelligible corridors By advancing space syntax theory and methods the volume brings together emerging research on hospital environments Opening with a description of hospital architecture that emphasizes everyday relations the sequence of chapters takes an unusually comprehensive view that pairs spaces and occupants in hospitals the patient room and its intervisibility with adjacent spaces care teams and on ward support for their work and the intelligibility of public circulation spaces for visitors The final chapter moves outside the hospital to describe the current healthcare crisis of the global pandemic as it reveals how healthcare institutions must evolve to be adaptable in entirely new ways Reflective essays by practicing designers follow each chapter bringing perspectives from professional practice into the discussion The Covert Life of Hospital Architecture makes the case that latent dimensions of space as experienced have a surprisingly strong link to measurable outcomes providing new insights into how to better design hospitals through principles that have been tested empirically It will become a reference for healthcare planners designers architects and administrators as well as for readers from sociology psychology and other areas of the social sciences   EDRA; Proceedings of the Annual Environmental Design Research Association Conference Environmental Design Research Association,1996   *The Built Environment: Environmental technology, construction engineering, building and materials* Terence M Russell,1989   **Architecture and Philosophy** Winand W.
