The Options Course George A. Fontanills,2005-03-11 Use this invaluable tool to gain a competitive edge and avert bad investment decisions Well known options strategist and instructor George Fontanills has updated his time tested and bestselling book The Options Course The new edition improves and expands upon the original to help you avoid some common and costly options mistakes The systematic step by step approach covers everything from basic concepts to sophisticated techniques and is designed for investors at all levels of experience [The Committee to Destroy the World](#) Michael E. Lewitt,2016-03-15 An updated examination of what s weakening the U S economy and how to fix it The Committee to Destroy the World Inside the Plot to Unleash a Super Crash on the Global Economy is a passionate and informed analysis of the struggling global economy In this masterfully conceived and executed work Michael Lewitt one of Wall Street s most respected market strategists and money managers updates his groundbreaking examination of the causes of the 2008 crisis and argues that economic and geopolitical conditions are even more unstable today His analysis arrives in time for the impending economic and geopolitical debates of the 2016 election season Lewitt explains in detail how debt has now overrun the world s capacity how federal policies of the past few decades have created a downward vortex sapping growth and vitality from the American economy and how greed and corruption are preventing reform The financial crisis created tens of trillions of debt leaving investors to pay a huge price for these policy failures The highest asset inflation we ve seen in our lifetimes although the government claims there isn t enough inflation More than 2 trillion of stock buybacks funded with low cost debt that are artificially inflating stock prices The Federal Reserve and other global central banks becoming the largest buyers of government debt in order to suppress interest rates An M A boom resulting from companies needing to find growth outside of their core businesses While the financial media misses the story Lewitt pulls no punches explaining how all of these trends are leading to the brink of another crisis Lewitt lays out a survival plan for the average investor to protect their assets when the debt bubble bursts The first edition of this book expressed hope that policymakers would not let the financial crisis go to waste This book urges investors to learn from the crushed hope and take action before the next crisis

Optioneering - Make \$1000's in Extra Income Every Month Optioneering Ltd.,2015-03-30 What is the Optioneering Strategy The Optioneering Strategy is an options trading strategy that was developed and perfected over the past 4 1 2 years The options strategy finds its roots in market statistics and is designed to minimize risk The fundamental difference between the Optioneering strategy and any other stock or options trading strategy available today is that the Optioneering Strategy is a Reactive Strategy Practically all stock picking and option trading strategies books and websites are focused on helping investors more accurately predict the direction of a stock or the underlying market With the Optioneering Strategy you don t need to predict which way the market is going to go you just need to react to it Trying to predict what a stock or the stock

market will do tomorrow next week or next hour is impossible for the average investor The number of inputs that move the markets on a day to day hour by hour minute by minute time frame are impossible to comprehend Earnings politics economic data geopolitical news weather terrorism commodities interest rates the Fed etc all move the markets How can anyone possibly predict where the market will go next week next month or next year with all these variables Well some people out there claim they can The spectrum is broad from charlatans who operate websites making ridiculous claims to professional financial advisers Lets reflect on this for a moment If you are ill you see your doctor you expect with a high degree of confidence that he she will come to a diagnosis that is accurate and prescribe the necessary medication to see that you get better How can a financial adviser diagnose the markets a disease with constantly changing symptoms They may claim they can but I would bet statistically they are no better than flipping a coin Safety First A key objective of the Optioneering Strategy is to minimize risk A strategy whereby if a loss were to occur it would not wipe out months of profit or wipe us out completely like so many other option strategies The basic strategy is founded on establishing setup positions each month that generate a profit consistently The setups involve a combination of debit calendar spreads and reverse credit calendar spreads There are 7 basic rules 4 on setup and 3 for closing If you follow the rules losses will remain small and profits will be maximized A lot of other books on option strategies will tell you how the strategies work but they won't tell you how to consistently generate profits by applying them They still require you to correctly bet on market direction Applying standard option trading strategies in a predictive manner is no better than flipping a coin and runs the risk of generating large losses Minimal Capital I started with 20 000 but one could easily get started with as little as 5000 to 10 000 The Optioneering Strategy is structured to minimize risk and margin It is a brilliantly leveraged yet a well hedged strategy that generates a profit 84% of the time Over 4 1 2 years I grew 20 000 to over 200 000 During that period I placed 44 trade set ups of which 37 generated a profit and 7 resulted in a loss The average of 37 monthly profits was 5 350 and the average of 7 monthly losses was 1950 Minimal Time Invested Other than making money saving time is the second best part of the strategy Most days I spend 1 to 2 minutes a day just checking the market Really just keeping an eye on it in the event I need to react to the market action On my setup days it takes me about 10 minutes to get my order in and set That's it Minimal time invested I don't need to know the news that drives the market and I don't really care I only need to react to the market if it moves to prescribed limits we establish with each setup trade Getting time back is the best part of the Optioneering Strategy I can focus on work and spend more time with my family Less Stress and Anxiety With the Optioneering Strategy you place the exact same type of trades every month at the same time regardless of what the market has done or is doing There are a total of 7 rules to follow and they guide you on setting up the trade and exiting the trade Investment stress and anxiety are rooted in trying to decide if you should buy sell or hold your positions With the Optioneering Strategy there is none of that as you have certainly in what to do when entering and exiting every trade Getting Started Whether you are familiar with options or

not the Optioneering Strategy is written with the novice in mind Not only will it inform you of what you need to know but walks you through every trade placed over the past 4 1 2 years Every trade contains a chart historic options chain data and commentary on every trade The Optioneering Strategy allows you to take control of your financial future That s what I did and I m now sharing this experience with you
