Abstract:- The effectiveness of software projects hinges on smooth information exchange among different teams involved, including project managers, team members, developers, designers, and clients. Given that many software companies handle multiple projects simultaneously, there's a pressing need for streamlined project management and virtual collaboration. Manual oversight of students' final year projects is arduous. This project seeks to develop an automated system for overseeing student activities, offering functionalities for project management, supervision, monitoring, and virtual teamwork. This system caters to the needs of students, project coordinators, and guides by facilitating seamless sharing and interaction.

Keywords:- Project Management System, PMS, Meetings, Collaborative Learning System.

I. INTRODUCTION

Improving an organization's handling of projects, from planning to execution and monitoring, is possible through the integration of a project management system (PMS), a comprehensive software solution. Acting as a centralized platform, it fosters effective teamwork, resource management, and informed decision-making.

A PMS's main function is to assist enterprises in navigating the intricacies of project management with the use of strong tools. It gives teams the authority to specify project goals, allot resources, set deadlines, monitor development, and guarantee successful project completion.

An organization might need a mode to virtually uphold discussions and share their data. While many platforms provide such services of data sharing but don't have a feature to schedule meetings over the system. On the other hand, the systems that provides meeting features cannot share data.

The approach is thus based on the idea of having a system that combines these features and provides a collaborative learning system.

➤ Research Gaps

Despite searching through numerous programs and conducting surveys, there was no specific project management system that could offer features for uploading and sharing data while keeping track of the members and enabling them to hold meetings among themselves.

➤ Aim

To design and develop a Project Management System (PMS) that showcases online meeting and management capabilities while providing users with a platform to collaboratively work together and share the data.

➤ What Constitutes A Project ?

In accordance with BS ISO 10006:1997, a project can be delineated as a unique endeavour encompassing a sequence of coordinated, monitored, organized, and supervised tasks with explicit initiation and conclusion points. The primary objective of any project is to fulfil predetermined criteria, while it should meet specific requirements, undertaking the steps to achieve those objectives also considering factors like time, budget, and available resources [1].

Virtual Collaboration Manual:

The Handbook of High Performance Virtual Teams Jill Nemiro, Michael M. Beyerlein, Lori Bradley, Susan Beyerlein, 2015-06-10 The Handbook of High Performance Virtual Teams is an essential resource for leaders, virtual team members, and work group leaders. The editors provide a proven framework based on five principles for working collaboratively across boundaries of time, space, and culture. Written by experts in the field, the contributors offer practical suggestions and tools for virtual teams who need to assess their current level of effectiveness and develop strategies for improvement. This important resource also contains an array of illustrative cases as well as practical tools for designing, implementing, and maintaining effective virtual work.

Handbook of Virtual Work Lucy L. Gilson, Thomas O'Neill, M. T. Maynard, 2023-05-09 In light of the COVID-19 pandemic, this timely Handbook builds upon research and practice to discuss and assess what is currently known about virtual work and its evolution given the increasing numbers of those working virtually.

Virtual Team Collaboration Jasmin Mahadevan, 2024-08-26 Spurred by the COVID-19 pandemic, new forms of working together have been developed, such as global or local virtual team collaboration or extensive work from home. Today, work is increasingly team-based, digitalized, and flexible, with wide-ranging implications for the skill set required by employees, management, and organizations for how humans are going to integrate work and life and for how future society, business, and ecology will develop. In this textbook, with an excellent didactic structure, students and practitioners find a wide range of knowledge in ten essential areas of virtual team collaboration. It covers key requirements, responsibilities, and practices for setting up and maintaining high-performance virtual teams on both local and global levels. This textbook has been recommended and developed for university courses in Germany, Austria, and Switzerland.

Virtual Team Success Richard Lepsinger, Darleen DeRosa, 2010-09-09 In today's complex organizations, it is not uncommon to have as many as 50 percent of employees working on virtual teams.
