Inclusion Chemistry with Zeolites: Nanoscale Materials by Design N.

Herron, D.R. Corbin, 2012-12-06 Zeolites with their crystalline microporous structures are cordial hosts to a wide variety of guests. However, it was the abrupt and unexpected departure of one of these guests, water, from a host, stilbite, on heating which led Cronstedt in 1756 to coin the term zeolite from the Greek meaning boiling stone to describe this material. Since that time, approximately 40 different naturally occurring zeolites have been discovered on earth. Recent studies of meteorite compositions have shown that these guest host materials, e.g., sodalite, occur in other parts of the universe as well. However, it wasn't until the twentieth century that synthetic routes to zeolites and other non-aluminosilicate molecular sieves were discovered. In addition, with the development of X-ray diffraction and the various spectroscopies, better understanding of the nature of the cavities, cages, and channels of these materials has led to the industrial exploitation of their guest host properties. The world of zeolites has now expanded into a greater than 2 billion pound per year business with major applications in detergent formulations, catalysis, and as adsorbents and desiccants. Their economic impact is difficult to determine; however, the improvement in gasoline yields alone from catalytic cracking must account for hundreds of billions of dollars in increased GDP. In this volume, we have brought together a sampling of recent developments in various areas of guest host or inclusion chemistry in zeolites.

Lifestyle Medicine Jeffrey I. Mechanick, Robert F. Kushner, 2025-05-26 This book represents the third in a series of Springer textbooks on Lifestyle Medicine by Dr. Mechanick and Dr. Kushner. The first book focused on theory and practice concepts. The second book focused on implementation with a specific tactic of building a lifestyle medicine center. This third book focuses on scientific evidence to close research gaps, knowledge gaps, and practice gaps. The general intent is to imbue the field of lifestyle medicine with scientific evidence. The other intent is to continue advancing a culture of preventive care for chronic disease using lifestyle medicine, but again through a tactic of emphasizing science, evidence, and critical thinking. Lifestyle Medicine: Closing Research, Practice, and Knowledge Gaps is organized into three sections. In the first section, driver-based chronic disease models and other elements that pertain to lifestyle medicine are explored in terms of current levels of scientific substantiation. In the second section, educational modalities are presented that can improve awareness of scientific and experiential knowledge by healthcare professionals. Topics include innovative teaching models, web-based activities, training, and accreditation programs, and certification exams. In the third section, a variety of clinical scenarios are presented to highlight practice gaps, implementation issues where there is inadequate clinical action despite an awareness of the pertinent knowledge. The topics span critical domains that must be addressed so that lifestyle medicine can lead to favorable outcomes in people and populations at risk. These domains include alcohol and substance abuse, colitis, brain health, environmental risk, pharmacotherapy, de-escalation, routine change, socioeconomics, transculturalization, advanced analytics, home cardiac rehabilitation, digital twin technology, and a highly referenced

discussion of the lifestyle medicine ecosystem and infrastructure Care is taken to provide not only theoretical foundations but also case studies where appropriate to emphasize critical aspects In conclusion this third book on Lifestyle Medicine will complement the previous two Springer books and define a compendium of resources necessary for anyone interested in this field

The Fat Pedagogy Reader Erin Cameron, Constance Russell, 2016-03-30 Over the past decade concerns about a global obesity epidemic have flourished. Public health messages around physical activity, fitness, and nutrition permeate society despite significant evidence disputing the facts we have come to believe about obesity. We live in a culture that privileges thinness and enables weight based oppression, often expressed as fat phobia and fat bullying. New interdisciplinary fields that problematize obesity have emerged, including critical obesity studies, critical weight studies, and fat studies. There also is a small but growing literature examining weight based oppression in educational settings, in what has come to be called fat pedagogy. The very first book of its kind, *The Fat Pedagogy Reader*, brings together an international interdisciplinary roster of respected authors who share heartfelt stories of oppression, privilege, resistance, and action; fascinating descriptions of empirical research; confessional tales of pedagogical misadventures; and diverse accounts of educational interventions that show promise. Taken together, the authors illuminate both possibilities and pitfalls for fat pedagogy that will be of interest to scholars, educators, and social justice activists. Concluding with a fat pedagogy manifesto, the book lays a solid foundation for this important and exciting new field. This book could be adopted in courses in fat studies, critical weight studies, bodies and embodiment, fat pedagogy, feminist pedagogy, gender and education, critical pedagogy, social justice education, and diversity in education.

Nutritional Therapy along the Continuum of Care Barbara Troesch, Matthias Pirlich, 2024-07-12 At the 2022 ESPEN conference, the International Declaration on the Human Right to Nutritional Care was presented, stating the ethical obligation to ensure optimal nutritional care. Still, in our aging populations, patients often present with a range of chronic conditions that, in combination with poor lifestyle choices and other factors such as polypharmacy, affect their nutritional status. Often hidden behind adipose tissue, their muscle mass is decreased, and intakes of essential nutrients are low while inflammatory levels are chronically increased.
