**Teaching Physical Education for Learning** Judith Rink,2025 The lack of physical activity of children and youth has created a major health problem in the United States and in many countries around the world Physical education programs have been given the responsibility to develop the skills knowledge and dispositions to prepare students for a lifetime of physical activity Preparing students for a lifetime of physical activity is quite different from providing physical activity If our job was to just provide physical activity it would be relatively easy If we are to ensure that students are active outside the school setting and as adults physical education programs must carefully select what they teach and will need to teach that content effectively The focus of Teaching Physical Education for Learning is on the generic instructional skills teachers need to be effective in producing student learning regardless of the content to be taught Teaching is a process that is both interactive and context specific Teachers need the technical skills of teaching and need to apply them situationally to different content and to different student needs In a sense that means that teaching skills are necessary but not sufficient to be an effective teacher
