Restivo, 2013-12-01 This is the first book by a sociologist devoted exclusively to a general sociology of mathematics The author provides examples of different ways of thinking about mathematics sociologically The survey of mathematical traditions covers ancient China the Arabic Islamic world India and Europe Following the leads of classical social theorists such as Emile Durkheim Restivo develops the idea that mathematical concepts and ideas are collective representations and that it is mathematical communities that create mathematics not individual mathematicians The implications of the sociology of mathematics and especially of pure mathematics for a sociology of mind are also explored In general the author's objective is to explore conjecture suggest and stimulate in order to introduce the sociological perspective on mathematics and to broaden and deepen the still narrow shallow path that today carries the sociology of mathematics This book will interest specialists in the philosophy history and sociology of mathematics persons interested in mathematics education students of science and society and people interested in current developments in the social and cultural analysis of science and mathematics Engineering and Contracting, 1908 *The Age of the Social* Sal Restivo, 2018-06-12 The concept of society sui generis society as a level of reality which could be studied scientifically crystallized in the middle of the nineteenth century in Europe with the work of Durkheim Marx and Weber and today more than at any other period in history the idea of the social has gained a foothold in philosophy biology and neuroscience However this idea has emerged into prominence not through the historical or contemporary efforts of sociologists but mainly through the efforts of biologists and neuroscientists This book seeks to re-establish the credentials of sociology as the science of society While acknowledging the amalgamation of traditional disciplines into interdisciplinary and multidisciplinary networks of research and theory and championing interdisciplinarity in recognising the capacity of converging perspectives to yield more interesting general theories of social life the author defends disciplinarity in maintaining sociology's achievements as a discipline With chapters on the sociological world view imagining society the self love education mathematics and religion *The Age of the Social* re-states the importance

of sociology as the source of robust ideas about the social in an age in which this notion has grown in importance As such it will appeal to scholars across the social sciences with interests in method and philosophy in the social disciplines
