

Things Snowball

James M. Lawler

Things Snowball:

Substance Joshua Hoffman, Gary Rosenkrantz, 2002-02-07 Substance has been a leading idea in the history of Western philosophy Joshua Hoffman and Gary S Rosenkrantz explain the nature and existence of individual substances including both living things and inanimate objects Specifically written for students new to this important and often complex subject Substance provides both the historical and contemporary overview of the debate Great Philosophers of the past such as Aristotle Descartes Spinoza Leibnitz Locke and Berkeley were profoundly interested in the concept of substance And the authors argue a belief in the existence of substances is an integral part of our everyday world view But what constitutes substance Was Aristotle right to suggest that artefacts like tables and ships don t really exist Substance Its Nature and Existence is one of the first non technical accessible guides to this central problem and will be of great use to students of metaphysics and philosophy

Matter and Spirit James M. Lawler, 2006 This narrative shows how the contours of moral and political philosophy in the seventeenth and eighteenth centuries were shaped by Kant s two distinct philosophical responses to the results of modern science This history of early modern Western philosophy takes its inspiration from Kant s claim that the battle between the metaphysics of matter and that of spirit is the principal axis around which modern philosophy up to his time in all its aspects has revolved The empiricist materialist trend that dominates in England is first examined in the progressively unfolding works of Hobbes Locke Berkeley Hume and Adam Smith A contrasting and competing dialectic develops in the rationalist spiritualist trend in the continental philosophy of Descartes Leibniz and Rousseau Framing this history is the background context of the philosophy and science of Aristotle and the challenges to the traditional paradigm presented by the revolutionary sciences of Copernicus Galileo and Newton James Lawler is Professor of Philosophy at the State University of New York at Buffalo

Things Snowball Rich Hall, 2002-11-04 Rich Hall s inventive and subversively funny book includes such gems as a description of his idyllic childhood in Eastern Tennessee where he used to help operate his grandparent s backyard nuclear reactor

Metaphysics Peter van Inwagen, 2024-01-22 This book is an introduction to metaphysics It presupposes no previous acquaintance with philosophy and addresses the following questions What is metaphysics Is there a plurality of things or is there only one thing Is there an external world a world of things that exist independently of human thought and sensation What is time Is there such a thing as objective truth Why is there something rather than nothing Does our existence have a meaning Are we physical or non physical beings Do we have free will Are there things that do not exist Do universals exist This Fifth Edition differs from the Fourth in that the long previously difficult chapter on time has been extensively rewritten making it much more accessible and engaging for the student reader In addition the author has enhanced clarity throughout the text with improvements to word choice sentence structure and paragraph lucidity Finally the Notes and Suggestions for Further Reading at the end of each chapter and the General Bibliography have all been brought up to date Key Features Presupposes no prior acquaintance with philosophy making the

book ideal for the undergraduate student or interested general reader Offers 13 chapters organized into three parts and each with its own introduction The Way the World Is Why the World Is The Inhabitants of the World Incorporates extensive revisions to Chapter 4 on temporality Includes updates to the Chapter Notes and Suggestions for Further Reading as well as to the General Bibliography **Things Snowball B Special** Rich Hall,2003-10 **damn, DELIGHTFUL DOPAMINE-DISCHARGE...** John E.
