Thinking About Development:

Thinking about Development Bjorn Hettne, 2009-10-15 This book is a concise and accessible introduction to development thinking contemporary development theory and practice and a critical analysis of the values that lie behind them Hettne argues that schools of development thinking should be historically contextualized not presented as evolving towards a universal theory The book will present development as an essentially contested concept that has meant a number of things at various times to different people in different places Focusing on historical discourses from the initial colonial encounters through to the modern day Hettne draws the connections between the enlightenment belief in progress through to the more recent focus on the Millennium Development Goals The first volume in the Development Matters series this book provides the key frame for the series as a whole enabling readers to locate texts on themes such as environmental justice technology and development learning within a broader historical conceptual and political context than the immediate policy and output needs of neoliberalism

Thinking About Development Lisa Peattie, 2012-03-02 This book intends to be helpful to people students and others who are beginning to think about how to change the world via that activity we call development planning The issues of What is Progress and How do we get it are world wide although they appear in different form in societies like our own from the way they do in the Third World countries with their explicit development planning These are two very big questions and have no easy or final answers However we can think about them in more rather than less effective ways Thinking about them can be both a way of beginning to take action on issues of growth and change and a way of understanding our own situation vii viii I PREFACE This book argues that thinking about development planning has gotten into trouble by dividing economy from society and misconstruing moral social political issues as technical ones Development planning has centered on economic planning treating social issues as obstacles to growth or as problems arising out of economic change The book takes up a number of specific topics which enter into development planning topics such as the organization of work educational planning family policy to show how in reality the social and the economic the moral and the technical are one and how thinking about policy in each area should therefore take an integrated perspective

Thinking about Development Paul Patrick Streeten, 1997-07-24 Paul Streeten is recognised as one of the profession's most eminent authorities on economic development In these lectures he provides a major statement on his approach to the development problem stressing that human development not simply income growth should be the focus of all strategies to eradicate hunger and poverty in the world His argument assigns an important role to reformed government both in providing social services and in facilitating the functioning of markets in opposition to the prevailing idea that minimal government is more often than not the optimal solution The role of small and larger firms institutions central and local government is also carefully examined Streeten outlines a normative political economy how to mobilise reformist alliances how to use interest group how to harness coalition in the pursuit of effective development

The Postwar Evolution of Development Thinking

Charles P. Oman, Ganeshan Wignaraja, 1991-08-08 Development thinking and development practice are in a state of flux theory apparently offering little by way of solutions to the crisis of development This book provides a fresh and critical survey of the different schools of development thought A unique feature of this book is that both orthodox and heterodox schools of development thinking are covered in an up to date and non technical manner The book will be of use to students development theorists and practitioners **New Theory of Children's Thinking Development: Application in Language Teaching** Kekang He, 2015-10-23 This book proposes a new theory on children's thinking cognitive development According to this theory the stages of said development should be divided into four stages first the stage of animalistic thinking birth before possessing basic language ability second the stage of elementary thinking beginning to possess basic language ability beginning to possess proficient oral ability third the stage of intermediate thinking beginning to possess proficient oral ability before the formation of comprehensive cognitive ability and fourth the stage of advanced thinking after the formation of comprehensive cognitive ability In this context thinking includes logical thinking visual thinking and intuitive thinking Based on the new theory the author points out the serious negative impact that Piaget's stage theory of children's cognitive development has had on Chinese language education in China The book also offers a number of practical principles such as five teaching activities for language teaching of extension typing writing passage and thinking The Postwar Evolution of Development Thinking Charles Oman, Ganeshan Wignaraja, 1991 *The Evolution of Development Thinking* William Ascher, Garry D. Brewer, G. Shabbir Cheema, John M. Heffron, 2018-02-13 This landmark book offers a comprehensive analysis of how development approaches have evolved since World War II examining and also evaluating the succession of theories doctrines and practices that have been formulated and applied in the Third World and beyond Covering all developing regions the book offers an integrated approach for considering the entwined aspects of development governance economics foreign assistance civil society and the military With reference to carefully chosen case studies the authors offer distinctive explanations for why development approaches fall short and systematically relate the evolution of development thinking to current challenges identifying the strengths and weaknesses of key institutions and the clashes of institutional interests that have distorted otherwise sound doctrines and negatively affected development practice In identifying the dynamics that account for shortcomings in past development attempts and recommending a better integration of doctrines across the entire range of inter connected development fronts the book points to how development practice may be improved to better advance human dignity Remarks on the Perspectives of Development Thinking Z. Bablewski, **Empowering Decision-Making in Midwifery** Elaine Jefford, Julie Jomeen, 2019-08-29 Decision making pervades all aspects of midwifery practice across the world Midwifery is informed by a number of decision making theories but it is sometimes difficult to marry these theories with practice This book provides a comprehensive exploration of decision making for midwives irrespective of where in the world they practice or in which model of care The first part critically reviews decision making

theories including the Enhancing Decision making Assessment in Midwifery EDAM tool and their relevance to midwifery It explores the links between midwifery governance including professional regulation and the law risk and safety and decision making as well as how critical thinking and reflection are essential elements of decision making It then goes on to present a number of diverse case studies demonstrating how they interrelate to and impact upon optimal midwifery decision making Each chapter presents examples that show how the theory translates into practice and includes activities to reinforce learning points Bringing together a diverse range of contributors this volume will be essential reading for midwifery students practising midwives and midwifery academics

The Development of Development Thinking, 1976 *The Development of Thinking and Reasoning* Pierre Barrouillet, Caroline Gauffroy, 2013 Thinking and reasoning are key activities for human beings In this book a distinguished set of contributors provides a wide readership with up to date scientific advances in the developmental psychology of thinking and reasoning both at the theoretical and empirical levels The first part of the book illustrates how modern approaches to the study of thinking and reasoning have gone beyond the Piagetian legacy through the investigation of avenues previously not explored and by demonstrating that

young children have higher capacities than was assumed within the Piagetian tradition The second part focuses upon theoretical and empirical investigations of the interplay between logic and intuition in reasoning and decision making and how these forms of thinking evolve with age through the general framework of what is known as dual process theories Contrary to Piaget's claim it becomes apparent that elaborate adult reasoning could rely on some form of intuition The Development of Thinking and Reasoning provides psychologists educators and everyone interested in child development with an integrated and up to date series of chapters written by prominent specialists in the areas of thinking reasoning and decision making
