[The Big Nine](#) Amy Webb,2019-03-05 A call to arms about the broken nature of artificial intelligence and the powerful corporations that are turning the human machine relationship on its head We like to think that we are in control of the future of artificial intelligence The reality though is that we the everyday people whose data powers AI aren t actually in control of anything When for example we speak with Alexa we contribute that data to a system we can t see and have no input into one largely free from regulation or oversight The big nine corporations Amazon Google Facebook Tencent Baidu Alibaba Microsoft IBM and Apple are the new gods of AI and are short changing our futures to reap immediate financial gain In this book Amy Webb reveals the pervasive invisible ways in which the foundations of AI the people working on the system their motivations the technology itself is broken Within our lifetimes AI will by design begin to behave unpredictably thinking and acting in ways which defy human logic The big nine corporations may be inadvertently building and enabling vast arrays of intelligent

systems that don't share our motivations, desires, or hopes for the future of humanity. Much more than a passionate human-centered call to arms, this book delivers a strategy for changing course and provides a path for liberating us from algorithmic decision makers and powerful corporations.

Thinking by Machine Pierre de Latil, 1956 Outlook Alfred Emanuel Smith, Francis Walton, 1891 **The Human Machine** Arnold Bennett, 1911 **Solomon's Code** Olaf Groth, Mark Nitzberg, 2018-11-06

A thought-provoking examination of artificial intelligence and how it reshapes human values, trust, and power around the world. Whether in medicine, money, or love, technologies powered by forms of artificial intelligence are playing an increasingly prominent role in our lives. As we cede more decisions to thinking machines, we face new questions about staying safe, keeping a job, and having a say over the direction of our lives. The answers to those questions might depend on your race, gender, age, behavior, or nationality. New AI technologies can drive cars, treat damaged brains, and nudge workers to be more productive, but they also can threaten, manipulate, and alienate us from others. They can pit nation against nation, but they also can help the global community tackle some of its greatest challenges, from food crises to global climate change.

In clear and accessible prose, global trends and strategy adviser Olaf Groth, AI scientist and social entrepreneur Mark Nitzberg, along with seasoned economics reporter Dan Zehr, provide a unique, human-focused global view of humanity in a world of thinking machines.
