Contributions from around the world. *The Economics of the Digital Society* Luc Soete, Bas Ter Weel, 2005. Presents research into the economics of the digital society. This important new book presents a unique body of research into the economics of the digital society. It questions how modern economies have been transformed as a result of digital goods and markets and explores the policy implications and challenges of this revolution. Luc Soete and Bas ter Weel have assembled leading economists and social scientists to provide an invaluable insight into the influence of the digital society in the core fields of economics.
