

SQL JOIN USING clause with SELECT *

On the other hand, if we run a SELECT * query that features the USING clause:

```
1 | SELECT *  
2 | FROM post  
3 | INNER JOIN post_comment USING(post_id)  
4 | ORDER BY post_id, post_comment_id
```

We are going to get the following result set:

post_id	title	post_comment_id	review
1	Java	1	Good
1	Java	2	Excellent
2	Hibernate	3	Awesome

We can see that the post_id column is deduplicated, so there is a single post_id column being included in the result set.
