## **Using Language The Structures Of Speech Acts:**

**Using Language** John T. Kearns, 1985-06-30 In a pioneer study of how language is actually used Dr Kearns combines the rigor of formal logic with a detailed analysis of natural language patterns Through this double focus he develops artificial languages that are syntactically more similar to the spoken word than first order language itself Numerous diagrams illustrate the evolution of these artificial languages which represent a significant contribution to both the fields of linguistics and logic The book begins by delineating a theory of the structures of intentional acts and then applies this to the special case of linguistic acts Given an understanding of the meanings of component expressions we can use our knowledge of linguistic structure to determine the meaning of a complex expression An innovative discussion of semantics is subdivided into theories of three semantic dimensions representational meaning inferential meaning and truth conditions Drawing upon these analyses the speech act theory of this book purposes that the meaning of a sentence sentential act is to be explained wholly in terms of the meanings of component expressions acts and the structure of the sentence

**Propositional Structure and Illocutionary Force** Jerrold J. Katz, 1980 This book offers a new theory of the structure of propositions which provides a uniform treatment of constative and performative sentences Jerrold Katz shows that performatives can enter into logically valid arguments even though as Austin claimed they can't be true or false Katz also argues that speech act theory is not a theory at all but an assortment of observations about heterogeneous aspects of the performance of speech acts He shows that a better explanation of speech acts is given by a grammatical account of the illocutionary potential of sentences and a separate pragmatic account of how this potential is realized in actual speech situations Katz provides such a grammatical account which makes it possible for the first time to explain the illocutionary potential of sentences within grammar

**Speech Act Theory and Pragmatics** John Searle, F. Kiefer, M. Bierwisch, 2012-12-06 In the study of language as in any other systematic study there is no neutral terminology Every technical term is an expression of the assumptions and theoretical presuppositions of its users and in this introduction we want to clarify some of the issues that have surrounded the assumptions behind the use of the two terms speech acts and pragmatics The notion of a speech act is fairly well understood The theory of speech acts starts with the assumption that the minimal unit of human communication is not a sentence or other expression but rather the performance of certain kinds of acts such as making statements asking questions giving orders describing explaining apologizing thanking congratulating etc Characteristically a speaker performs one or more of these acts by uttering a sentence or sentences but the act itself is not to be confused with a sentence or other expression uttered in its performance Such types of acts as those exemplified above are called following Austin illocutionary acts and they are standardly contrasted in the literature with certain other types of acts such as perlocutionary acts and propositional acts Perlocutionary acts have to do with those effects which our utterances have on hearers which go beyond the hearer's understanding of the utterance Such acts as convincing persuading annoying amusing and frightening are all

cases of perlocutionary acts      **Foundations of Speech Act Theory** S.L. Tsohatzidis,2002-09-11 Foundations of Speech Act Theory investigates the importance of speech act theory to the problem of meaning in linguistics and philosophy The papers in this volume written by respected philosophers and linguists significantly advance standards of debate in this area Beginning with a detailed introduction to the individual contributors this collection demonstrates the relevance of speech acts to semantic theory It includes essays unified by the assumption that current pragmatic theories are not well equipped to analyse speech acts satisfactorily and concludes with five studies which assess the relevance of speech act theory to the understanding of philosophical problems outside the area of philosophy of language      *Discourse as Structure and Process* Teun A. van Dijk,1997 What are the structures of discourse and what are the functions of these structures in the communicative context This volume explains how and why discourse is organized at various levels The multidisciplinary contributions illustrate that discourse analysis goes far beyond the linguistic answer of designing grammars and goes hand in hand with the study of their uses and functions in the social context Comprehensive and accessible the volume covers a huge variety of discourse genres including written and spoken and storytelling and argumentation The chapters also illustrate the necessity to examine the mental processes of the language users How do people go about producing understanding and remembering text or talk The book stresses that both discourse and its mental processing have a social basis and can only be fully understood in relation to social interaction      **Discourse as Structure and Process** Professor Teun A. van Dijk,1997-02-11 What are the structures of discourse and what are the functions of these structures in the communicative context This volume explains how and why discourse is organized at various levels The multidisciplinary contributions illustrate that discourse analysis goes far beyond the linguistic answer of designing grammars and goes hand in hand with the study of their uses and functions in the social context Comprehensive and accessible the volume covers a huge variety of discourse genres including written and spoken and storytelling and argumentation The chapters also illustrate the necessity to examine the mental processes of the language users How do people go about producing understanding and remembering text or talk      **Language and Action** Danilo Marcondes de Souza Filho,1984 This work consists of an examination and revision of some of the main theses of Speech Act Theory in relation to the problem of ideology and action guiding language Starting from the idea that linguistic philosophy must take into account how the social structure of the linguistic community may influence and direct the way its language is used a critical method of analysis is proposed developing Speech Act Theory in a way suitable for this purpose The main guideline of this proposal is the consideration that a theory of action rather than a theory of meaning should be taken as central in the analysis of language The notion of illocutionary force the problem of intentions and conventions in the constitution of speech acts the definition of context and the classification of speech acts are then discussed Based on the conclusions of this discussion a pragmatic method for the analysis of language is formulated      *Readings in Distributed Artificial Intelligence* Alan H. Bond,Les Gasser,2014-06-05 Most artificial intelligence research

investigates intelligent behavior for a single agent solving problems heuristically understanding natural language and so on Distributed Artificial Intelligence DAI is concerned with coordinated intelligent behavior intelligent agents coordinating their knowledge skills and plans to act or solve problems working toward a single goal or toward separate individual goals that interact DAI provides intellectual insights about organization interaction and problem solving among intelligent agents This comprehensive collection of articles shows the breadth and depth of DAI research The selected information is relevant to emerging DAI technologies as well as to practical problems in artificial intelligence distributed computing systems and human computer interaction Readings in Distributed Artificial Intelligence proposes a framework for understanding the problems and possibilities of DAI It divides the study into three realms the natural systems approach emulating strategies and representations people use to coordinate their activities the engineering science perspective building automated coordinated problem solvers for specific applications and a third hybrid approach that is useful in analyzing and developing mixed collections of machines and human agents working together The editors introduce the volume with an important survey of the motivations research and results of work in DAI This historical and conceptual overview combines with chapter introductions to guide the reader through this fascinating field A unique and extensive bibliography is also provided

**Speech Acts** John R. Searle, 1969-01-02 This small but tightly packed volume is easily the most substantial discussion of speech acts since John Austin's *How To Do Things With Words* and one of the most important contributions to the philosophy of language in recent decades *Philosophical Quarterly* [Toward Multimodal Pragmatics](#) Lihe Huang, 2021-12-29 Classic pragmatic theories emphasize the linguistic aspect of illocutionary acts and forces However as multimodality has gained importance and popularity multimodal pragmatics has quickly become a frontier of pragmatic studies This book adds to this new research trend by offering a perspective of situated discourse in the Chinese context Using the multimodal corpus approach this study examines how speakers use multiple devices to perform illocutionary acts and express illocutionary forces Not only does the author use qualitative analysis to study the types characteristics and emergence patterns of illocutionary forces he also performs a quantitative corpus based analysis of the interaction of illocutionary forces emotions prosody and gestures The results show that illocutionary forces are multimodal in nature while meaning in discourse is created through an interplay of an array of modalities Students and scholars of pragmatics corpus linguistics and Chinese linguistics will benefit from this title *Social Movement Discourse* Teun A. van Dijk, 2023-12-22 This is both the first systematic introduction to Discourse Studies for students and scholars of social movements and a study of discourses on the European refugee crisis by leading theorist Teun A van Dijk Concrete examples of different kinds of discourse are vital for the study of social movements because their activities are not limited to such well known forms of contention as marches occupations or strikes but also daily discursive activities such as meetings assemblies interviews press conferences manifestos pamphlets banners graffiti websites blogs social media posts and everyday talk This book proposes that empirical

analyses of these discourses should go beyond the popular but vague notion of frame and engage in more detailed and explicit analyses of the text and talk of social movements This is a much needed introduction to the most important structures of discourse and a detailed theoretical account of the notion of solidarity defining the Refugees Welcome movement

*Linguistics and Language Behavior Abstracts* ,1999 *Speech Act Phenomenology* R.L. Laningan,2012-12-06 The nature and function of language as Man s chief vehicle of communication occupies a focal position in the human sciences particularly in philosophy The concept of communication is problematic because it suggests both meaning the nature of language and the activity of speaking the function of language The philosophic theory of speech acts is one attempt to clarify the ambiguities of speech as both the use of language to describe states of affair and the process in which that description is generated as communication The present study *Speech Act Phenomenology* is in part an examination of speech act theory The theory offers an explanation for speech performance that is the structure of speech acts as relationships and the content of speech acts as meaning The primary statement of the speech act theory that is examined is that presented by Austin A secondary concern is the formulation of the theory as presented by Searle and Grice The limitations of the speech act theory are specified by applying the theory as an explanation of human communication This conceptual examination of communication suggests that the philosophic method of analysis does not resolve the antinomy of language nature and function Basically the conceptual distinctions of the speech act theory i.e locutions illocutions and perlocutions are found to be empty as a comprehensive explanation of the concept communication
