## **Spillets Kunst:**

**Spillets kunst** Johannes Riis, 2003 *Spillets kunst* is the first work to systematically treat the relation between acting and emotions in films. It is addressed to everybody who has ever been seduced by the art of filmmaking and wondered what the actors are doing and how they succeed in carrying us away.

**Screening Characters** Johannes Riis, Aaron Taylor, 2019-03-06 Characters are central to our experiences of screened fictions and invite a host of questions. The contributors to *Screening Characters* draw on archival material, interviews, philosophical inquiry and conceptual analysis in order to give new thought-provoking answers to these queries. Providing multifaceted accounts of the nature of screen characters, contributions are organized around a series of important subjects including issues of class, race, ethics and generic types as they are encountered in moving image media. These topics in turn are personified by such memorable figures as Cary Grant, Jon Hamm, Audrey Hepburn and Seung-ho Kim, in addition to avatars, online personalities, animated characters and the ensembles of shows such as *The Sopranos*, *Mad Men* and *Breaking Bad*.

**Realism and 'reality' in Film and Media** Anne Jerslev, 2002 The 2002 theme of *Northern Lights* is dedicated to the representation of reality in film, TV and new media, a question of new importance in modern film and media where a new wave of realism has dominated cinema and reality TV became a mass phenomenon on both TV and the internet. Eleven articles by Danish, British and American film and media researchers focus on two sub-themes. *Film and Realism* deals theoretically with film realism and analyses classic films and modern Danish Dogma films. *Documentary Forms*, *Reality TV* and *New Media* treats new forms of non-fiction film, TV and on the internet in a both theoretical and historical perspective.

*Film Style and Story* Lennard Højbjerg, Peter Schepelern, 2003 Style and story are two of the most debated concepts in film studies today. Taking a cognitive perspective, the anthology *Film Style and Story* focuses explicitly on the stylistic portrayal of human behavior in film, ranging from studies of specific visual patterns to sound montages. Contributions to this volume all share two characteristics: they explore the ways in which styles and stories interact and they are inspired by the work of Torben Grodal, professor of Film and Media Studies, University of Copenhagen.

*Visual Authorship* Torben Kragh Grodal, Bente Larsen, Iben Thorving Laursen, 2005 *Visual Authorship* is a collection of essays which offers a new approach to the study of authorship. The contributors point out that individual creativity is essential in the richly faceted media landscape of today. The individual creativity and the role of authorship are discussed in relation to film, television, computer games and the Internet. Theories of cognition and emotion offer new tools for the understanding of visual aesthetics; they explain why works of art are created by individuals and not by discourses and ideologies. Several contributors analyse in detail the works of Lars von Trier.
