The Role of Personality in Influencing Consumer Choices in the Sustainable Fashion Industry,2024-04-09 Seminar paper from the year 2022 in the subject Business economics Customer Relationship Management CRM grade A Robert Gordon University Aberdeen Business Management course Consumer Psychology language English abstract The demand for sustainable fashion has increased due to the fashion industry s negative impact on the environment and society Sustainable fashion consumption involves conscious consumer choices and is influenced by personal values beliefs and attitudes Personality traits are also known to influence consumer behavior and decision making This study aims to investigate the impact of personality traits on sustainable fashion consumption The study seeks to identify the personality traits that are most relevant to sustainable fashion consumption and to explore how these traits influence consumer choices in the sustainable fashion industry The conceptual framework suggests that personality traits experiential consumption and brand loyalty are essential factors in sustainable fashion consumption and should be considered in marketing strategies and consumer behavior research The Five Factor Model FFM theory and the Theory of Planned Behavior TPB are used to explain the impact of personality traits on consumer choices in the context of sustainable fashion consumption The study will make a significant contribution to the literature on sustainable fashion consumption and consumer behavior by providing insights into the role of personality traits in sustainable fashion consumption and practical implications for sustainable fashion brands and their marketing strategies

Consumer Attitude towards Recycled Fashion Garments. Which factors make recycled fashion more appealing to consumers? Rebecca Serban,2022-01-31 Master s Thesis from the year 2021 in the subject Business economics Customer Relationship Management CRM grade 1 3 Frankfurt School of Finance Management language English abstract In the present master s thesis two experiments a survey and A B testing examined consumer behavior and attitude in the context of recycled fashion in order to accept or reject five different hypotheses One of the objectives of the survey conducted for this master s thesis was to investigate whether consumers prefer certain recycled materials over others The materials studied were recycled cotton recycled plastic and recycled pineapple leaves With the help of several statistical tests in RStudio it was found that recycled cotton is the most popular recycled material in comparison In addition the aim was to investigate whether consumers also prefer certain garments over others when buying recycled fashion and whether the proximity of the garment to the skin has a particular influence here Here too an analysis in RStudio revealed that it is not necessarily the proximity of the skin but rather the level of intimacy that is decisive Finally the

survey was intended to investigate whether and to what extent consumers feel disgust towards recycled fashion and how consumer disgust can be avoided Practical and theoretical management implications especially for fashion companies were being discussed in order to provide companies with a way to implement recycled fashion most effectively focusing on the right choice of materials fashion type and communication
