Voice And Inversion Typological Studies In Language:

Voice and Inversion T. Givón, 1994-05-30 This collection aims first to establish a structure independent language independent definition of pragmatic voice and more specifically then a universal functional definition of inverse The grammar and pragmatic function of the four major voice constructions direct active inverse passive antipassive are surveyed using narrative texts from 14 languages Koyukon Athabascan Plains Cree Algonquian Chepang Tibeto Burman Squamish and Bella Coola Salish Sahaptin Sahaptian Kutenai isolate Surinam Carib Carib Spanish and Greek Indo European Korean Maasai Nilotic Cebuano and Karao Philippine The comparative quantified study of pragmatic voice functions tests the validity of a universal functional definition of voice and in particular of inverse The cross language comparison of grammatical structures that code the various voice functions then lays down the foundation for a non trivial cross language typology of inverse

Oesterreicher, Wolfgang Raible, 2008-07-14 No detailed description available for Language Typology and Language Universals 2 Teilband **Egyptian-Coptic Linguistics in Typological Perspective** Eitan Grossman, Martin

Haspelmath, Tonio Sebastian Richter, 2014-12-17 This volume presents the Egyptian Coptic language in cross linguistic typological perspective It is aimed at linguists of all stripes especially typologists historical linguists and specialists in Egyptian Coptic Afroasiatic languages or African languages Uniquely the contributions are written by both typologists and experts of Egyptian Coptic and typologists The former provide case studies dealing with particular aspects of the various phases of the Egyptian Coptic language e g COLLIER on conditional constructions while the latter situate Egyptian Coptic data in cross linguistic perspective e g those by GUELDEMANN and GENSLER The volume also includes an introductory section that includes an overview of the Egyptian Coptic language HASPELMATH a sketch of its sociohistorical setting GROSSMAN RICHTER its relationship with language typology RICHTER and the way in which Egyptian Coptic data should be presented to nonspecialists focusing on transliteration and glossing GROSSMAN HASPELMATH This is the first book to bring together language typology and the Egyptian Coptic language in an explicit fashion *Typological Hierarchies in Synchrony and Diachrony* Sonia Cristofaro, Fernando Zúñiga, 2018-07-15 Typological hierarchies are widely perceived as one of the most important results of research on language universals and linguistic diversity Explanations for typological hierarchies however are usually based on the synchronic properties of the patterns described by individual hierarchies not the actual diachronic processes that give rise to these patterns cross linguistically This book aims to explore in what ways the investigation of such processes can further our understanding of typological hierarchies To this end diachronic evidence about the origins of several phenomena described by typological hierarchies is discussed for several languages by a number of leading scholars in typology historical linguistics and language documentation This evidence suggests a rethinking of possible explanations for typological hierarchies as well as the very notion of typological universals in general For this reason

the book will be of interest not only to the broad typological community but also historical linguists cognitive linguists and psycholinguists

Studies in Language ,2001 Typology of Verbal Categories L. I. Kulikov, Heinz Vater, 1998 The typological studies of this volume are oriented towards the areas of interests of the Russian typologist Vladimir P Nedjalkov to whom the volume is dedicated They deal with the typology of verbal categories The book is divided into three parts 1 Ergativity and transitivity 2 Voice causative and valency 3 Tense and mood In all three parts of the volume instances of grammaticalization are pointed out and investigated The studies concern various languages e g English French German Russian Hungarian Dutch Tariana a North Arawak language from North West Amazonia Dumi a Tibeto Burman language and Lak a Daghestanian language

Ellipsis and Reference Tracking in Japanese Shigeko Nariyama, 2003-11-24 In many East Asian languages despite the prevalent occurrence of implicit reference reference management is largely achieved without recourse to familiar agreement features For this reason recovering ellipted reference has been a perplexing problem in the analysis of these languages This book elucidates the linguistic mechanisms for ellipsis resolution in Japanese mechanisms which involve complex processes of inference that integrate grammatical sociolinguistic and discourse considerations with real world knowledge These processes are realised in an integrated algorithm the validity of which is tested against naturally occurring written texts This book also builds connections between theoretical linguistics and practical applications The findings not only have theoretical implications for identifying crucial factors in the linguistic encoding of implicitly expressed information factors which are very different from those found in European languages but also offer practical applications particularly for the design of machine translation systems and for learners of Japanese
