William James Bruce Wilshire, 1984-06-30 The importance of this collection of writings of William James lies in the fact that it has been arranged to provide a systematic introduction to his major philosophical discoveries and precisely to those doctrines and theories that are of most burning current interest *William James The Essential Writings* is a series of philosophical arguments on some of the most obscure and head cracking problems in contemporary philosophy the relation of thought to its object the interrelationships between meaning and truth the levels and structures of experience the degrees of reality the nature of the embodied self the relation of ethics aesthetics and religious experience to man s strenuously and heroically active nature and above all the structurization of the experienced life world as the validating ground and origin of all theory Bruce Wilshire has provided an introduction to William James s thought on these and other related points which is at once both substantial and subtle

William James: Writings 1902-1910 (LOA #38) William James, 1988-02-01 Philosopher and psychologist William James was the best known and most influential American thinker of his time The five books and nineteen essays collected in this Library of America volume represent all his major work from 1902 until his death in 1910 Most were originally written as lectures addressed to general audiences as well as philosophers and were received with great enthusiasm His writing is clear energetic and unpretentious and is marked by the devotion to literary excellence he shared with his brother Henry James In these works William James champions the value of individual experience with an eloquence and enthusiasm that has placed him alongside Emerson and Whitman as a classic exponent of American democratic culture In *The Varieties of Religious Experience* 1902 James explores the very inner citadel of human life by focusing on intensely religious individuals of different cultures and eras With insight compassion and open mindedness he examines and assesses their beliefs seeking to measure religion s value by its contributions to individual human lives In *Pragmatism* 1907 James suggests that the conflicting metaphysical positions of tender minded rationalism and tough minded empiricism be judged by examining their actual consequences Philosophy James argues should free itself from unexamined principles and closed systems and confront reality with complete openness In *A Pluralistic Universe* 1909 James rejects the

concept of the absolute and calls on philosophers to respond to the real concrete sensible flux of life Through his discussion of Kant Hegel Henri Bergson and religion James explores a universe viewed not as an abstract block but as a rich manyness in oneness full of independent yet connected events *The Meaning of Truth* 1909 is a polemical collection of essays asserting that ideas are made true not by inherent qualities but by events James delights in intellectual combat stating his positions with vigor while remaining open to opposing ideas *Some Problems of Philosophy* 1910 was intended by James to serve both as a historical overview of metaphysics and as a systematic statement of his philosophical beliefs Though unfinished at his death it fully demonstrates the psychological insight and literary vividness James brought to philosophy Among the essays included are the anti imperialist *Address on the Philippine Question* *On Some Mental Effects of the Earthquake* a candid personal account of the 1906 California disaster and *The Moral Equivalent of War* a call for the redirection of martial energies to peaceful ends as well as essays on Emerson the role of university in intellectual life and psychic research
