Womens Work:

Woman's Work and Woman's Culture Josephine Elizabeth Grey Butler, 1869 **Women's Work** Ferren

Gipson, 2022-06-14 This powerful and insightful work offers a bold celebration of the innovative brilliant artists reclaiming the idea of women's work. In the history of western art decorative and applied arts including textiles and ceramics have been separated from the high arts of painting and sculpture and deemed to be more suitable for women. Artists began to reclaim and redefine these materials and methods energizing them with expressions of identity and imagination. *Women's Work* tells the story of this radical change highlighting some of the modern and contemporary artists who dared to defy this hierarchy and who through experimentation and invention transformed their medium. The work of these women has helped underscore the ongoing value of these art forms within the history of art championing women's work as powerful mediums worthy of celebration. With biographical entries on each artist featured as well as beautiful images of their artworks *Women's Work* raises up the work of these visionary and groundbreaking artists telling their stories and examining their artistic legacies.

Key Issues in Women's Work Catherine Hakim, 2004 Rethinking patriarchy and male dominance **Women's Work, 1840-1940** Elizabeth Roberts, 1995-09-28 This volume addresses some of the difficult issues surrounding women's work during a century of social upheaval and demonstrates how hard it is to be precise about the nature and extent of women's occupations. It focuses on working class women and the many problems relating to their work full time and part time paid and unpaid outside and inside the home. Elizabeth Roberts examines men's attitudes to women's work the difficulties of census enumeration and women's connections with trade unions. She also tackles in depth other areas of contention such as the effects of legislation on women's work a family wage and unequal pay and status. Dr Roberts study provides a unique overview of an expanding field of social and economic history while her survey of the available literature is a useful guide to further reading. [A History of European Women's Work](#) Deborah Simonton, 2002-09-11 The work patterns of European women from 1700 onwards fluctuate in relation to ideological demographic economic and familial changes. In *A History of European Women's Work* Deborah Simonton draws together recent research and methodological developments to take an overview of trends in women's work across Europe from the so called pre industrial period to the present. Taking the role of gender and class in defining women's labour as a central theme Deborah Simonton compares and contrasts the pace of change between European countries distinguishing between Europe wide issues and local developments. **Women's Work**, 1978 **Transforming Women's Work** Thomas L. Dublin, 2018-07-05 I am not living upon my friends or doing housework for my board but am a factory girl asserted Anna Mason in the early 1850s. Although many young women who worked in the textile mills found that the industrial revolution brought greater independence to their lives most working women in nineteenth century New England did not according to Thomas Dublin. Sketching engaging portraits of women's experience in cottage industries factories domestic service and village schools Dublin demonstrates that the autonomy of working women

actually diminished as growing numbers lived with their families and contributed their earnings to the household From diaries letters account books and censuses Dublin reconstructs employment patterns across the century as he shows how wage work increasingly came to serve the needs of families rather than of individual women He first examines the case of rural women engaged in the cottage industries of weaving and palm leaf hatmaking between 1820 and 1850 Next he compares the employment experiences of women in the textile mills of Lowell and the shoe factories of Lynn Following a discussion of Boston working women in the middle decades of the century particularly domestic servants and garment workers Dublin turns his attention to the lives of women teachers in three New Hampshire towns

Cleveland Women's Journal ,1917 *Women's Work And Women's Lives* Hilda Kahne,Janet Z Giele,Editors *,Joseph H Pleck,Marianne A Ferber,Francine Blau,1992-10-20 A provocative analysis of the nature of the relation between women and paid work in both modernizing and industrial countries this book explores the variables that shape the relationship demographic factors the social and cultural context the political environment and the level and direction of economic development Contributors point to a number of similarities in the roles activities and status of women in countries with varying levels of development but they also argue that women s productive activities in both market and nonmarket economies exhibit distinctive characteristics having evolved in ways that reflect the particular circumstances of the country An introductory section provides a historical and sociological framework for the analysis as well as a statistical overview of women s nonagricultural employment The country case studies that follow focus on health education and family roles and provide a wealth of data about the characteristics of paid work and the workplace including occupations and earnings technological change pay equity work schedules cooperatives and the informal labor market

Women, Work, and Divorce Richard R. Peterson,1989-01-01 This book considers how women cope with the economic hardship which accompanies divorce using national longitudinal data on a generation of women in the United States These women came of age at a time when they were expected to give priority to family roles over work roles Yet by the time many of them were divorced in the 1970s with the climate of changing perceptions of gender roles women were expected to work and were unprepared for the economic disruption caused by divorce Peterson analyzes the experiences of women drawing upon sociological and economic approaches to the study of labor market outcomes and of life cycle events He shows how over the long term most divorced women can make at least a partial recovery but divorced women with children have a more difficult time making work adjustments and experience greater economic deprivation Given the continuing high rates of divorce Peterson s findings highlight the importance of work rather than marriage for women s economic security
