

The Harvard Center for Work-Life Research has developed the following guide for employers

The 5x questions checklist for an effective hybrid workplace model

01

What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it is designed for the people.

Before making any significant decisions or investments, it is important to understand the preferences, needs, and expectations of the employees, their families, and the organization as a whole. This can be done through surveys, focus groups, and other research methods.

The next step is to build a hybrid work model that will meet the needs of all employees and address the most common challenges faced by your team.

Have you thought about how you could deliver a personalized employee experience? How will you support the employees' needs and address the challenges they face?

At Harvard, we can help you with this. Contact us today to learn more.
