- Doctrine centered on the “Deep Battle”
- Soviet Union began the interwar period with the weakest Air Force, but by World War II had built a relatively effective force from the ground up.
- Two very innovative Soviet air theorists emerged in the period
  - Mikhail Frunze (1885 - 1923)
  - Mikhail Tukhachevski (1893 - 1937)

Soviet Military Strategy in Space Nicholas L. Johnson, 1987 I bogen undersøger Sovjets deltagelse og rolle i militariseringen af det ydre rum fra den første sputnik i okt 1957 til anti satellit systemer og ripost på USAs SDI **Soviet Strategic Forces** Robert P. Berman, John C. Baker, 1982 The Militarization and Weaponization of Space Matthew Mowthorpe, 2004-01-01 The militarization of space began as a rivalry between the United States and the Soviet Union and grew to enormous proportions during the height of the Cold War Satellite reconnaissance navigation and weapons guidance and electronic intelligence comprise only a few of the efforts taken to militarize and dominate space Today as the prominence of information technology computing and telecommunications advances so does the concept of space as a battlefield In The Militarization and Weaponization of Space Matthew Mowthorpe diligently analyzes the military space policies of the United States the Soviet Union Russia and the People's Republic of China from the Cold War period to the present day Mowthorpe focuses on the development of the ballistic missile defense and other anti satellite systems and aptly assesses to what degree space will become armed This work cogently addresses an issue of increasing urgency to scholars of international politics

**Soviet Military Strategy** Vasilii Danilovich Sokolovskii, 1963 *The Soviet Space Programme* Ronald D. Humble, 2024-04-12 *The Soviet Space Programme* 1988 presents a comprehensive overview of the Soviet space programme from its beginnings up to the end of the 1980s One important theme explored is the degree to which the Soviet space programme was oriented towards military capabilities The book concludes that the degree of military involvement was indeed high Space Weapons and U.S. Strategy Paul B. Stares, 2021-01-26 This book first published in 1985 analyses the factors that have shaped the militarization of space By examining in great detail the determinants of U S policy it explains why for over 25 years space did not become the scene of an arms race and why this began to change in the late 1970s Both superpowers did however develop a limited anti satellite capability in the 1960s and these programmes are also discussed

*Space Warfare* John J. Klein, 2012-09-10 This new study considers military space strategy within the context of the land and naval strategies of the past Explaining why and how strategists note the similarities of space operations to those of the air and naval forces this book shows why many such strategies unintentionally lead to overemphasizing the importance of space based offensive weaponry and technology Counter to most U S Air Force doctrines the book argues that space based weapons don't imbue superiority It examines why both air and naval strategic frameworks actually fail to adequately capture the scope of real world issues regarding current space operations Yet by expanding a naval strategic framework to include maritime activities which includes the interaction of land and sea the breadth of issues and concerns regarding space activities and operations can be fully encompassed Commander John Klein United States Navy uses Sir Julian Corbett's maritime strategy as a strategic springboard while observing the salient lessons of other strategists including Sun Tzu Clausewitz Jomini and Mao Tse tung to show how a space strategy and associated principles of space warfare can be derived
