**Material Feminisms: New Directions for Education** Carol Taylor, Gabrielle Ivinson, 2018-02-02 Material Feminisms New Directions for Education provides a range of powerful theoretical and innovative methodological examples to illuminate how new material feminism can be put to work in education to open up new avenues of research design and practice It poses challenging questions about the nature of knowledge production the role of the researcher and the critical endeavour arising from inter and post disciplinarity Working with diffractive methodologies and new materialist ecological epistemologies the book offers resources for hope which widen the scope for how educational problems are interrogated and provides a political counter movement to neo positivist outcomes based approaches within education Inspired by writers such as Barad Bennett and Deleuze and Guattari the book makes a radical break with cognitive dualist and universal conceptions of human subjectivity and intelligence in education By taking its starting point as the co constitutiveness of discourse materiality corporeality and place the book foregrounds educational practices as material enactments of multiple non linear entangled affective and relational forces It offers new insights into how gender class and ethnicity are constituted in and by material assemblages that are often submerged or unseen This book is an essential starting place for those intrigued by what new theoretical accounts of materiality posthumanism and affect can offer educational research Diffractive methodologies challenge readers to take a fuller range of actors into account than in

objective humanist methodologies and in so doing to pay closer attention to what data is It invites researchers to engage with long standing feminist concerns about power and knowledge production in research processes This book was originally published as a special issue of Gender and Education New Directions in Rough Sets, Data Mining, and Granular-Soft Computing Ning Zhong, Setsuo Ohsuga, 2004-06-22 This book constitutes the refereed proceedings of the 7th International Workshop on Rough Sets Fuzzy Sets Data Mining and Granular Soft Computing RSFDGrC 99 held in Yamaguchi Japan in November 1999 The 45 revised regular papers and 15 revised short papers presented together with four invited contributions were carefully reviewed and selected from 89 submissions The book is divided into sections on rough computing foundations and applications rough set theory and applications fuzzy set theory and applications nonclassical logic and approximate reasoning information granulation and granular computing data mining and knowledge discovery machine learning and intelligent agents and systems **The Dawn** ,1910 *The New Way* Herbert Coryn, Percy Leonard, 1928
