Spacehounds of Ipc - the Original Classic Edition Edward E. Smith,2012-06 Spacehounds of IPC by Edward E Smith Ph D The Original Classic Edition Finally available a high quality book of the original classic edition This is a new and freshly published edition of this culturally important work which is now at last again available to you Enjoy this classic work today These selected paragraphs distill the contents and give you a quick look inside To do so safely you must pass the last meteorological station M14 on schedule time plus or minus five seconds at scheduled velocity plus or minus ten meters with exactly the given negative acceleration of 981.27 centimeters and exactly upon the pilot ray M14 will have set for you In fact from a study of the charts of the last few weeks Im pretty sure that E2 is at least four thousand kilometers this side of where he thinks he is that W41 is ten or twelve thousand beyond his station and that theyve both got a lateral displacement thats simply fierce Of course I know as well as you do that its rotten technique to change acceleration at every check station but weve told em over and over that we cant do any better until they put a real computer on every ship and tell the check stations to report

meteorites and other obstructions to us and then to let us alone And speaking of reporting I know already that a lot of you astronomical guessers have only the faintest possible idea of where you really are plus minus or lateral and if you dont get yourselves straightened out before we get to W41 Im going to make a report on my own account that will jar some of you birds loose from your upper teeth Now putting other peoples ideas to work was Roesers long suit dont think that Im belittling Roeser at all either for he was a brave and far sighted man was no mean scientist and was certainly one of the best organizers and synchronizers the world has ever known and since Martian and Tellurian science complemented each other so that one filled in the gaps of the other it wasnt long until fleets of space freighters were bringing in air and water from Venus which had more of both than she needed or wanted [Spacehounds of IPC](#) Edward Elmer Doc Smith,2021-03-29 When the Inter Planetary Corporation s top spaceliner Arcturus took off on a routine flight to Mars it turned out to be the beginning of a most unexpected and long voyage attacked by a mysterious spaceship the liner crash landed on Ganymede The survivors must first master that world s primeval terrors then construct a new spacecraft and finally find a way to deal with the warring intelligences of the Jovian system **Spacehounds of Ipc** E.
