Spanish Steps:

The City: Land use, structure, and change in the Western city Michael Pacione, 2002 *The Architecture of Rome* Ulrich Fürst, 1998

Architects and artists have always acknowledged over the centuries that Rome is rightly called the eternal city. Rome is eternal above all because it was always young always in its prime. Here the buildings that defined the West appeared over more than 2000 years here the history of European architecture was written. The foundations were laid even in ancient Roman times when the first attempts were made to design interiors and thus make space open to experience as something physical. And at that time the Roman architects also started to develop building types that are still valid today thus creating the cornerstone of later Western architecture. In it Rome's primacy remained unbroken whether it was with old St Peter's as the first medieval basilica or new St Peter's as the building in which Bramante and Michelangelo developed the High Renaissance or with works by Bernini and Borromini whose rich and lucid spatial forms were to shape Baroque as far as Vienna, Bohemia and Lower Franconia and also with Modern buildings of which there are many unexpected pearls to be found in Rome. All this is comprehensible only if it is presented historically i.e. in chronological sequence and so the guide has not been arranged topographically as usual but chronologically. This means that one is not led in random sequence from a Baroque building to an ancient or a modern one but the historical development is followed successively. Every epoch is preceded by an introduction that identifies its key features. This produces a continuous lavishly illustrated history of the architecture of Rome and thus at the same time of the whole of the West. Practical handling is guaranteed by an alphabetical index and detailed maps whose information does not just immediately illustrate the historical picture but also makes it possible to choose a personal route through history.

Learn about the history of the Spanish Steps in Rome with iMinds Travel's insightful fast knowledge series. The Spanish Steps are one of the most visited destinations in the Eternal City of Rome. This graceful staircase sits like the tiers to a great amphitheatre. But rather than a stage to watch those seated here can watch the drama and intrigue of Italian life from the safe distance of an inconspicuous spectator. People watching is a great Italian pastime and these steps form the prime place for it in the buzzing capital of Rome. Visitors like to join in on this secretive hobby when arriving in this area of Rome. What is highly interesting about the Spanish Steps is that they are a tourist attraction where visitors simply relax. They are named after the nearby Piazza di Spagna which translates to Spanish Square. The square lies at the bottom of the steps and is so named as the Spanish Embassy to the Vatican used to be close by. This piazza itself is of interest and has a famous sculpture of a boat. The fountain is known as La Barcaccia meaning Old Boat and is so named as it portrays a half sunken ship whose bows are overflowing with water. It was the last work of Pietro Bernini who was the father of the famous baroque artist Gian Lorenzo Bernini. The fountain was completed in about 1627 but the steps behind it stem from a later date. iMinds will tell you the story behind the place with its innovative travel series transporting the armchair traveller or getting you in the mood for discover on route to
