The Natural Order:

Multi-Stage Production Planning and Inventory Control Sven Axsäter, Christoph Schneeweiss, Edward Silver, 2012-12-06 This paper treats a two echelon inventory system The higher echelon is a single location referred to as the depot which places orders for supply of a single commodity The lower echelon consists of several points called the retailers which are supplied by shipments from the depot and at which random demands for the item occur Stocks are reviewed and decisions are made periodically Orders and or shipments may each require a fixed lead time before reaching their respective destinations Section II gives a short literature review of distribution research Section III introduces the multi echelon distribution system together with the underlying assumptions and gives a description of how this problem can be viewed as a Markovian Decision Process Section IV discusses the concept of cost modifications in a distribution context Section V presents the test examples together with their optimal solutions and also gives the characteristic properties of these optimal solutions These properties then will be used in section VI to give adapted versions of various heuristics which were used in assembly experiments previously and which will be tested against the test examples

Social Conflict and Educational Change in England and France 1789-1848 Michalina Vaughan,Margaret Scotford Archer,2010-06-24 This book analyses the processes of educational change in England and France by relating political social economic and ideological trends to the changing pattern of educational institutions from the time of the Industrial and French revolutions The authors first assess the relevance of major sociological theories for the interpretation of the main trends in education in both countries in the first half of the nineteenth century They then put forward an alternative approach derived from Weber which links educational change with social conflict This theory of domination and assertion of groups competing for control over formal instruction before the emergence of the state system is applied to England and France in this period The main part of the book is devoted to a more detailed analysis of the competing groups in both countries and of their ideologies which served as blueprints for educational reform
