The Imitation Game:

The Imitation Game Jane Rollason, 2015 Based on the award winning 2014 film *The Imitation Game* tells the true story of cryptanalyst Alan Turing and his brilliant team of code breakers as they crack the famous Enigma Code during World War II

The Imitation Game Ian McEwan, 1981

Alan Turing: The Enigma Andrew Hodges, 2014-11-10 A NEW YORK TIMES BESTSELLER The official book behind the Academy Award winning film *The Imitation Game* starring Benedict Cumberbatch and Keira Knightley It is only a slight exaggeration to say that the British mathematician Alan Turing 1912-1954 saved the Allies from the Nazis invented the computer and artificial intelligence and anticipated gay liberation by decades all before his suicide at age forty one This New York Times bestselling biography of the founder of computer science with a new preface by the author that addresses Turing's royal pardon in 2013 is the definitive account of an extraordinary mind and life Capturing both the inner and outer drama of Turing's life Andrew Hodges tells how Turing's revolutionary idea of 1936 the concept of a universal machine laid the foundation for the modern computer and how Turing brought the idea to practical realization in 1945 with his electronic design The book also tells how this work was directly related to Turing's leading role in breaking the German Enigma ciphers during World War II a scientific triumph that was critical to Allied victory in the Atlantic At the same time this is the tragic account of a man who despite his wartime service was eventually arrested stripped of his security clearance and forced to undergo a humiliating treatment program all for trying to live honestly in a society that defined homosexuality as a crime The inspiration for a major motion picture starring Benedict Cumberbatch and Keira Knightley *Alan Turing: The Enigma* is a gripping story of mathematics computers cryptography and homosexual persecution

Caudill, Shannon N. Conley, Michael E. Gorman, Martin Weinel, 2019-05-14 This book analyzes future directions in the study of expertise and experience with the aim of engendering more critical discourse on the general discipline of science and technology studies In 2002 Collins and Evans published an article entitled The Third Wave of Science Studies suggesting that the future of science and technology studies would be to engage in Studies in Expertise and Experience In their view scientific expertise in legal and policy settings should reflect a consensus of formally trained scientists and citizens with experience in the relevant field but not ordinary citizens The Third Wave has garnered attention in journals and in international workshops where scholars delivered papers explicating the theoretical foundations and practical applications of the Third Wave This book arose out of those workshops and is the next step in the popularization of the Third Wave The chapters address the novel concept of interactional experts the use of imitation games appropriating scientific expertise in law and policy settings and recent theoretical developments in the Third Wave [The Turing Test](#) James H. Moor, 2012-12-06 In 1950 Alan Turing 1912 1954 published his famous article Computing Machinery and Intelligence in the journal Mind This article is arguably the most influential and widely read article in the philosophy of artificial intelligence Indeed most of the debate in the philosophy of artificial intelligence over the last fifty years concerns issues that were raised and discussed by Turing Turing s genius was not only in developing the theory of computability but also in understanding the impact both practical and philosophical that computing machinery would have Turing believed that computers if properly designed and educated could exhibit intelligent behavior even behavior that would be indistinguishable from human intelligent behavior His vision of the possibility of machine intelligence has been highly inspiring and extremely controversial In this classic article Turing presented his well known imitation game and predicted that about the year 2000 an average interrogator will not have more than 70 per cent chance of making the right identification after five minutes of questioning in the imitation game Based on the results of the Loebner 2000 contest and the accomplishments in the field of AI as impressive as they are Turing s prediction remains unfulfilled *The Imitation Game* Graham Moore, 2014* **The Evolutionary Emergence of Language** Chris Knight, Michael Studdert-Kennedy, James Hurford, 2000-11-20 Language has no counterpart in the animal world Unique to Homo sapiens it appears inseparable from human nature But how when and why did it emerge The contributors to this volume linguists anthropologists cognitive scientists and others adopt a modern Darwinian perspective which offers a bold synthesis of the human and natural sciences As a feature of human social intelligence language evolution is driven by biologically anomalous levels of social cooperation Phonetic competence

correspondingly reflects social pressures for vocal imitation learning and other forms of social transmission Distinctively human social and cultural strategies gave rise to the complex syntactical structure of speech This book presenting language as a remarkable social adaptation testifies to the growing influence of evolutionary thinking in contemporary linguistics It will be welcomed by all those interested in human evolution evolutionary psychology linguistic anthropology and general linguistics

In 1951 two policemen Nock and Staehl investigate the mathematician Alan Turing after an apparent break in at his home During his interrogation by Nock Turing tells of his time working at Bletchley Park In 1927 the young Turing is unhappy and bullied at boarding school He develops a friendship with Christopher Morcom who sparks his interest in cryptography and develops romantic feelings for him Before Turing can confess his love Christopher dies unexpectedly from tuberculosis When Britain declares war on Germany in 1939 Turing travels to Bletchley Park where under the direction of Commander Alastair Denniston he joins the cryptography team of Hugh Alexander John Cairncross Peter Hilton Keith Furman and Charles Richards The team are trying to decrypt the Enigma machine which the Nazis use to send coded messages Turing is difficult to work with and considers his colleagues inferior he works alone to design a machine to decipher Enigma After Denniston refuses to fund construction of the machine Turing writes to Prime Minister Winston Churchill who puts him in charge of the team and funds the machine Turing fires Furman and Richards and places a difficult crossword in newspapers to find replacements Joan Clarke a Cambridge graduate surpasses Turing s test but her parents will not allow her to work with the male cryptographers Turing arranges for her to live and work with the female clerks who intercept the messages and shares his plans with her Turing s machine which he names Christopher is constructed but cannot determine the Enigma settings before the Germans reset the Enigma encryption each day Denniston orders it destroyed and Turing fired but the other cryptographers threaten to leave if he goes After Clarke plans to leave on the wishes of her parents Turing proposes marriage which she accepts During their reception Turing confirms his homosexuality to Cairncross who warns him to keep it secret After overhearing a conversation with a clerk about messages she receives Turing has an epiphany realising he can program the machine to decode words he already knows exist in certain messages After he recalibrates the machine it quickly decodes a message and the cryptographers celebrate however Turing realises they cannot act on every decoded message or the Germans will realise Enigma has been broken Turing discovers that Cairncross is a Soviet spy When Turing confronts him Cairncross argues that the Soviets are allies working for the same goals and threatens to disclose Turing s homosexuality if his role as an agent is revealed When the MI6 agent Stewart Menzies appears to threaten Clarke Turing reveals that Cairncross is a spy Menzies reveals that he knew this already and planted Cairncross among them in order to leak messages to the Soviets for British benefit Fearing for her safety Turing tells Clarke to leave Bletchley Park revealing that he is gay and lying about never having cared for her After the war Menzies tells the cryptographers to destroy their

work and that they can never see one another again or share what they have done In the 1950s Turing is convicted of indecency and in lieu of a jail sentence undergoes chemical castration so he can continue his work Clarke visits him in his home and witnesses his physical and mental deterioration She reminds him that his work saved lives and uses the phrase Christopher used of Turing and Turing once used of her Sometimes it is the people no one imagines anything of who do the things that no one can imagine
