The Intelligence of Feeling Robert Winston Witkin,1976 The Intelligence of Feeling Robert W. Witkin,1976 The Intelligence of feeling explored S. Freer,1983 **The Intelligence Wars: Logos Versus Mythos** Joe Dixon,2018-03-07

The most apocalyptic war of all is coming The battleground of Armageddon is being prepared The war will not be between the forces of good and evil but between the intelligent and the stupid Intelligent humanity 10% of the human race will take on Stupid humanity the remaining 90% The legions of dunces clowns idiots and Dunning Kruger fantasists will expect to use their sheer force of numbers to overwhelm the smart But they will never even see their enemy let alone engage them The smart people will be using weapons that they will deploy from thousands of miles away The dunces won't know what hit them They will be praying to their gods or meditating when they are engulfed by the Apocalypse Too late they will grasp that knowledge is power that prayers and meditation have never achieved a single worthwhile thing The Logos species have always lacked the will to beat the Mythos species Once they have the will nothing will stop them The End Game is coming It's time to choose your side The Intelligence ,1904 **The Intelligence behind Nature** Daniel Perret,2021-10-21 This book explores the conscious intelligence operating through nature through every tree river system or flower The author brings examples of what the work of nature spirits concretely consists of and how organized and complex nature is operating managing the transition from non physical energy consciousness to physical manifestation It is characteristic of us civilized people to deal with nature from a purely anthropocentric point of view even when this is called eco centric in the ecologist movement and the rights of nature initiatives It is presumed that in nature there are no intelligent communication partners that can express their own point of view The shift in consciousness that occurred with Newtonian science in the 17th century splitting away and ignore the conscious intelligence of nature created our whole unbalance and alienation towards nature and life Recent philosophical discoveries confirm that consciousness is based on feelings and does not need a brain in order to operate Quantum field theory and energy science are possibly converging in the understanding of how energy layers operate and become transformed into matter one coming from physics the other from spiritual healing Recent philosophical discoveries confirm that consciousness is based on feelings and does not need a brain in order to operate Quantum field theory and energy science are possibly converging in the understanding of how energy layers operate and become transformed into matter one coming from physics the other from spiritual healing Any communication with possible conscious beings in nature needs to fulfil some basic criteria especially when evaluating whether they can contribute to political or legal decisions A recent interview with the Loire River Elemental can give an idea of how useful such a cooperation might be Permission to Feel Marc Brackett, Ph.D.,2019-09-03 The mental well being of children and adults is shockingly poor Marc Brackett author of Permission to Feel knows why And he knows what we can do We have a crisis on our hands and its victims are our children Marc Brackett is a professor in Yale University's Child Study Center and founding

director of the Yale Center for Emotional Intelligence In his 25 years as an emotion scientist he has developed a remarkably effective plan to improve the lives of children and adults a blueprint for understanding our emotions and using them wisely so that they help rather than hinder our success and well being The core of his approach is a legacy from his childhood from an astute uncle who gave him permission to feel He was the first adult who managed to see Marc listen to him and recognize the suffering bullying and abuse he d endured And that was the beginning of Marc s awareness that what he was going through was temporary He wasn t alone he wasn t stuck on a timeline and he wasn t wrong to feel scared isolated and angry Now best of all he could do something about it In the decades since Marc has led large research teams and raised tens of millions of dollars to investigate the roots of emotional well being His prescription for healthy children and their parents teachers and schools is a system called RULER a high impact and fast effect approach to understanding and mastering emotions that has already transformed the thousands of schools that have adopted it RULER has been proven to reduce stress and burnout improve school climate and enhance academic achievement This book is the culmination of Marc s development of RULER and his way to share the strategies and skills with readers around the world It is tested and it works This book combines rigor science passion and inspiration in equal parts Too many children and adults are suffering they are ashamed of their feelings and emotionally unskilled but they don t have to be Marc Brackett s life mission is to reverse this course and this book can show you how

Drama and Intelligence Richard Courtney,1990-11-01 Drama as defined by Courtney encompasses all kinds of dramatic action from children s play to social roles and theatre He shows not only that teachers have found educational drama and spontaneous improvisation to be an invaluable learning tool but that many skills required for work and leisure reflect the theatrical ability to read others and see things from their point of view The main thrust of Drama and Intelligence is that drama can enhance and develop various aspects of intelligence Courtney suggests that the costumed player must bring into play many levels of intelligence in the rehearsal and execution of dramatic acts and that such acts offer unsurpassed opportunities to practice and develop these cognitive skills He uses the term intelligence to refer to the potential for specific types of mental activity and employs a theoretic analytic method to view cognition and intelligence in a post structuralist and semiotic mode Courtney examines such issues as the relation of the actual to the fictional the dramatic creation of meaning signs symbols and practical hypotheses and experi mental logic intuition and tacit modes of operation Drama and Intelligence will interest not only scholars and students of developmental drama but also those in the fields of dramatic and performance theory educational drama and drama therapy
