Congress. House. Committee on Education and Labor. Subcommittee on Elementary, Secondary, and Vocational Education,1980 **The IQ Mythology** Elaine Mensh,Harry Mensh,1991-04-20 Ever since Alfred Binet carried out a 1904 commission from France s minister of public instruction to devise a means for deciding which pupils should be sent to what would now be called special education classes IQ scores have been used to label and track children Those same scores have been cited as proof that different races classes and genders are of superior and inferior intelligence The Menshes make clear that from the beginning IQ tests have been fundamentally biased Offered as a means for seeking solutions to social problems the actual measurements have been used to maintain the status quo Often the most telling comments are from the test makers themselves whether Binet little girls weak in orthography are strong in sewing and capable in the instruction concerning housekeeping and all things considered this is more important for their future or Wigdor and Garner naive use of intelligence tests to place children of linguistic or racial minority status in special education programs will not be defensible in court Among the disturbing facts that the authors share is that there is mounting political pressure for more tests and testing despite a court trial in which the judge stated that defendants expert witnesses even those clearly affiliated with the companies that devise and distribute the standardized intelligence tests agreed with one exception that we cannot truly define much less measure intelligence The testing firms have responded to this carefully orchestrated need with new products that extend even to the IQ testing of three month old infants The authors stress that if the testers prevail there is little doubt that these and similar tests would be used ad infinitum to justify superior and inferior education along class and racial lines **A Body Living and Not Measurable: How Bodies are Constructed, Scripted and Performed Through Time and Space** Kathleen Glenister Robers,Ya-hui Irenna Chang,Łukasz Matuszyk,2019-07-22 This volume was first published by Inter Disciplinary Press in 2016 This volume crashes through many boundaries between academic disciplines between nations and cultures and finally between the concepts time space and body With contributors from architecture literary studies education cultural studies and other fields chapters take a special interest in the body as it is constructed scripted and performed through time and space Arranged into sections for ease of use in the advanced university course chapters explore significant questions for the 21st century What is time What is the relationship between space and existence

Who controls our bodies Is there hope for the future given hegemonic controls on the body From literature to freak shows from crime fiction to choreography and art installations to disability the lived body is explored in all its human puzzlement
