**The New Chemistry** Josiah Parsons Cooke, 2015-06-02 Excerpt from The New Chemistry The progress in chemistry during the ten years which have elapsed since this work was first published and stereotyped has been accompanied by no such revolution in its philosophy as the previous transition from the dualistic system of Berzelius to the unitary system of structural organic chemistry had involved Nevertheless there has been a constant advance during which we have gained clearer conceptions and more comprehensive views of the fundamental principles of the science and many of the accidental features which marked the transition period have disappeared Meanwhile the distinction between elementary substances and materials consisting of isolated elementary atoms has become clear and in making these last alone the elements of chemistry we have pushed our science if not to its extreme limits still one step further back and in taking this step we have left behind many of the anomalies which previously encumbered our philosophy About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art
