*The Prediction of Communist Economic Performance* P. J. D. Wiles, 1971 This study represents attempts dating from 1967 by nine experts on Communist economics to forecast the performance of individual Communist countries These predictions provide a great deal of comparable information and make experimental use of elementary econometrical techniques which have rarely been applied to these countries before The book also contains as a unique feature criticism and self criticism of the predictions of 1967 here reproduced unchanged in the light of subsequent events A most valuable by product is the analytical comparison of planning procedures and of agricultural ownership country by country so that the differing progress of the reforms can be easily grasped *The Prediction of Communist Economic Performance* P.
