The Satanic Mill:

The Satanic Mill Otfried Preussler,1991 In seventeenth century Germany a boy desperately wants to escape from a school for Black Magic where he is held captive by demonic forces [Krabat](#) ,2011 [Provisioning Paris](#) Steven Laurence Kaplan,2018-09-05 Dependence upon grain deeply marked every aspect of life in eighteenth century France Steven Kaplan focuses upon this dependence at the point where it placed the greatest strain on the state the society and the individual on the daily supply of grain and flour that furnished the staff of life He reconstructs the history of provisioning in pre industrial Paris and provides a comprehensive view of a culture shaped by the subsistence imperative Who were the agents of the provisioning trade What were their commercial practices What sorts of relations did they maintain with each other How did the authorities regulate their business To answer these questions Professor Kaplan combed the archives and libraries of France He maps out the elementary structures of the trade and shows how they were transformed as a result of cultural and political as well as commercial and technological changes In rich ethnographic detail he evokes the day to day life of merchants millers bakers brokers and market officials He shows how flour superseded grain and how the millers overtook the merchants in the provisioning process He explores the tension between the suppliers need for freedom and the consumers need for security Even as he weaves the intricate patterns of life inside and outside the marketplace he never loses sight of the immense interests at stake the stability and legitimacy of the government the durability of the social structure and the survival of the people [Whole Person Promotion, Women, and the Post-Pandemic Era: Impact and Future Outlooks](#) Crosby, Michelle,Faludi, Julianna,2022-05-20 The COVID 19 pandemic both accelerated social and household inequalities and made them more visible as the spatial and social divide between work and home life was broken down Historically during times of crisis or huge systematic change women have served as shock absorbers Shock absorption of systemic change by women as well as that of our planet s natural resources is not a new phenomenon and this dynamic persisted even during state socialism however in the current institutional setups there seems to be no logical solution because of the orientation around marketization and externalization by central actors Currently during a time of great precarity in our digital revolution old institutions are still counting on women the planet and other vulnerable groups to support this transformation with no clear protection of whole personhood [Whole Person Promotion Women and the Post Pandemic Era Impact and Future Outlooks](#) provides the latest empirical research findings in the post pandemic era with the household as the central unit of analysis It improves understanding of how old institutions persist and are even reinforced during times of crisis as well as generates a discussion about to what extent there is variation in experiences how satisfied we are with these dynamics and what internal and external interactions we can attribute to the world that we envision Covering topics such as individual wellbeing platform capitalism and gender inequality this premier reference source is a dynamic resource for lawyers policymakers government officials politicians business leaders managers economists non profit

Democracy in China Jiwei Ci,2019-11-19 Four decades of reform fostered a democratic mentality in China Now citizens are waiting for the government to catch up Jiwei Ci argues that the tensions between a largely democratic society and an undemocratic political system will trigger a crisis of legitimacy compelling the Communist Party to become agents of democratic change or collapse

The Almighty Machine Pekka Vahvanen,2022-02-25 The hymn of Digitalization is nothing new We must encourage the creation of new apps We must develop AI in order to prevail among international competition Technology s advance will halt climate change and let robots do the dumb stuff for us Our faith in technology is powerful because it has saved us in the past The Almighty Machine shows us technology s flip side The things that once powered us toward a brighter tomorrow are already undermining our quality of life The data stream has shattered our concentration human relationships have been reduced to a menu of emojis constant surveillance has nullified much of our privacy and the development of AI could be the beginning of the end for us We are becoming the casualties of our own success Pekka Vahvanen s bristling and timely critique deftly translated by Mark Jones throws doubt on the necessity of technological development in a world saturated in tech The Almighty Machine presents an important question Does progress no longer make us happier
