Conceptions of Truth Wolfgang Künne, 2003-06-06 Truth is one of the most debated topics in philosophy Wolfgang Künne presents a comprehensive critical examination of all major theories Conceptions of Truth is organized around a flow chart comprising sixteen key questions ranging from Is truth a property to Is truth epistemically constrained Künne expounds and engages with the ideas of many thinkers from Aristotle and the Stoics to Continental analytic philosophers like Bolzano Brentano and Kotarbinski to such leading figures in current debates as Dummett Putnam Wright and Horwich He explains many important distinctions between varieties of correspondence for

example between different conceptions of making true between various kinds of eternalism and temporalism which have so far been neglected in the literature K nne argues that it is possible to give a satisfactory modest account of truth without invoking problematic notions like correspondence fact or meaning And he offers a novel argument to support the realist claim that truth outruns justifiability The clarity of exposition and the wealth of examples will make Conceptions of Truth an invaluable and stimulating guide for advanced students and scholars in metaphysics epistemology and the philosophy of language
