Water and Post-Conflict Peacebuilding Erika Weinthal, Jessica J. Troell, Mikiyasu Nakayama, 2014-02-24 As a basic human need the provision of safe water is among the highest priorities of government and humanitarian interventions during post conflict recovery and peacebuilding In the aftermath of war water sanitation and infrastructure play a critical role in the recovery of livelihoods and economic development Moreover shared waters have great potential for interstate cooperation assisting to rebuild trust following conflict and to prevent a return to conflict This volume draws on studies from around the world to create a framework for understanding how water resources decisions and activities can facilitate or undermine peacebuilding in a post conflict setting

Limnology and Marine Biology in the Sudan Henri J. Dumont, A.I. El Moghraby, L.A. Desougi, 2012-12-06 This book IS an attempt to review the state of the art in the fields of limnology and of marine biology in the Sudan The need for it became apparent while we were doing some joint field work in the Nile Valley and along the Red Sea coast We feel that several reasons justify its publication Firstly a vast amount of information is being gathered year after year by the staff of the Hydrobiological Research Unit of the University of Khartoum in conjunction with the faculties of Medicine and Agriculture of this university much of this information fails to find an outlet to the scientific literature Secondly we did not want to restrict our book to the Nile Valley The Nile is such a vital life artery to the Sudan that it has dominated limnological efforts in this

country to the neglect of other geographical areas The same holds true for the field of marine biology which lags far behind despite the existence of a marine field laboratory at Suakin and a research institute at Port Sudan It is hoped that both will develop considerably in the near future

A Land Between Two Niles Martin A.J. Williams,D.A. Adamson,2021-10-15 Three themes run through this book the first is the history of the Nile the second is the degree to which the present Sudanese landscape reflects the operation of former geological processes the third is the interaction between man and environment not always to the benefit of either A land between two Niles is an interdisciplinary account of the origins and characteristics of the alluvial plains of the lower Blue and White Nile The contributors have focussed their attention upon this region for several reasons Although the Gezira plain itself only occupies about one percent of the total area of the Sudan the high quality long staple cotton grown there provides nearly two thirds of the country s total export revenue

Geology of Egypt ...: The metamorphic rocks, with preface by H. H. Thomas William Fraser Hume,1925 **The Encyclopaedia Britannica**,1929 The Geographical Magazine Sir Clements Robert Markham,1874
