Where God offers freedom** Eugenia Price,1966 **Faith and Place** Mark R. Wynn,2009-05-07 Faith and Place takes knowledge of place as a basis for thinking about the relationship between religious belief and our embodied life Recent epistemology of religion has appealed to various secular analogues for religious belief especially analogues drawn from sense perception and scientific theory construction These approaches tend to overlook the close connection between religious belief and our moral aesthetic and otherwise engaged relationship to the material world By taking knowledge of place as a starting point for religious epistemology Mark Wynn aims to throw into clearer focus the embodied action orienting perception structuring and affect infused character of religious understanding This innovative study understands the religious significance of a site in terms of i its capacity to stand for some encompassing truth about human life ii its conservation of historical meanings where these meanings make a practical claim upon those located at the place at later times and iii its directing of the believer s attention to a sacred meaning through enacted appropriation of the site Wynn proposes that the notion of God functions like the notion of a genius loci where the relevant locus is the sum of material reality He argues that knowledge of God consists in part in a storied and sensuous appreciation of the significance of particular places **The Lived Experience of Work and City Rhythms** Louise Nash,2022-01-27 The Lived Experience of Work and City Rhythms looks at the working environment with a focus on the geographical workplace how this affects the experience of our working lives and raises key questions such as does where we work affect our experience of work What is the relationship between place and work **Place and Time with Children Five to Nine** Joan Blyth,2026-02-27 First published in 1984 Place and Time with Children Five to Nine challenges the conventional curriculum in arguing that too much emphasis has been placed on the basics language and number skills to the exclusion of other aspects of the curriculum While teachers recognise that young children must be introduced to the past recent and distant and the environment near and far these are often topics selected at random This book puts the case for an approach that gives serious thought to the ways in which the Humanities might be integrated into a highly structured primary curriculum Exploring theoretical and practical aspects of such curriculum planning Place and Time

with Children Five to Nine will establish itself as an invaluable text for teachers and trainers alike
