World's Work ,1919 A history of our time **Future Yet to Come** Sonja M. Kim,Robert Ji-Song Ku,2021-09-30 South Korea is home to cutting edge electronics state of the art medical facilities and ubiquitous high speed internet The country s meteoric rise from the ashes of the Korean War 1950 1953 to rank among the world s most technologically advanced societies is often attributed to state led promotion of science and technology in nation building projects With chapters that discuss Korea s dynastic past foreign occupations Cold War geopolitics postwar rehabilitation in the twentieth century and the contemporary neoliberal moment Future Yet to Come argues that a longer historical arc and broader disciplinary approach better elucidate these transformations The book s contributors illuminate the sociotechnical imaginaries that promoted sustained and contested Korea s scientific medical and technological projects in realizing desired futures Focusing special attention on visual culture and the life sciences the essays present competing visions held by individuals and institutions of power in the use and purpose of scientific engagements They demonstrate Korean specificities in culture and language and the myriad social political spatial and symbolic arrangements that shaped incorporations of and changes to existing systems of knowledge and material practices Whether discussing moral epistemologies imperialist or

developmentalist thrusts in public health regimes or new configurations of the self enabled by bio industries and media technologies the book expands both the regional and global understanding of translation accommodation and transfer Tracing imaginaries across the vicissitudes of Korea s past recalls their history and makes visible their shifts and resilience in dynamic political economies Future Yet to Come reminds us how deeply intertwined science medicine and technology are to not only our polities corporations and societies but also the human condition Bridging histories of science and medicine with anthropologies of technology and the arts the book will appeal to students and scholars of Korean and East Asian studies as well as those with interests in the comparative history of medicine STS society and technology studies art history media studies transnationalism diaspora and postcolonialism *Library of the World's Best Literature* Charles Dudley Warner,1898 *Journal of Pharmaceutical Sciences* ,1913 Vols for 1912 45 include proceedings of the association s annual meeting *Home Laboratory Journal* ,1933 *Encyclopaedia of Religion and Ethics* James Hastings,John Alexander Selbie,Louis Herbert Gray,1917 **The Christian Century** ,1927 *The Open Court* Paul Carus,1907 vols 46 47 have special title New Orient Society monograph *Journal of the National Institute of Social Sciences* National Institute of Social Sciences,1918 List of members in v 2 4 6 7 9 *American Education* ,1921 *Journal of the Washington Academy of Sciences* Washington Academy of Sciences (Washington, D.C.),1922 Its Directory issued as the Sept no 1926 67 **Insights into the Relationships between Humanities and Sciences** Liliana Mammino,2026-02-02 This book offers an overview of existing and developing relationships between humanities and science considering those that have developed throughout centuries and still persist as well as novel relationships whose design needs to respond to modern challenges Its content responds to modern challenges as the relationships between humanities and sciences are becoming a hot theme above all because of the increasing awareness of the importance of their synergies to pursue sustainability effectively and in view of the merger of the former International Council for Science ICS and the International Social Science Council ISSC into one body The main challenge is the identification of practical routes for constructive synergies Knowing about existing and possible synergies is the key but this knowledge is not yet sufficiently present How many people would be able to mention examples in which some humanities born tool is fundamental in the sciences or some science born tool in the humanities The book proposes responses Because of increasing tendencies to underestimate the roles of humanities the book devotes extensive attention to the negative impacts resulting from the neglect of humanities born expertise It also sheds light on the fact that the separation between humanities and sciences is not as sharply defined as often assumed This book is of great value to students teachers and researchers at any level who wish to broaden their professional perspectives or attain a more complete understanding of human intellectual activities It can also be useful to anybody who has to make decisions about curricula and educational approaches
