of a multispecies world always in the making This book offers a total of fourteen articles written by international scholars in ecocriticism and eco-poetics who by their analyses of literature and or films and the political subtext they thus render visible aim at showing how the study of environmentally minded media may renew our attention to the entangled agencies of the human and the more than human realm Thus this work offers to counter a reproach ecocriticism has often been met with namely the over presence of US scholars and the lack of diversity in subjects in the field since the articles presented provide a wide variety of approaches and topics with examples of UK and Native American literature Polynesian myth graphic novels or haiku In doing so the book expands on the fields of ecocriticism and eco-poetics adding to this branch of study and enriching it with high quality academic studies
