Wild Giant Pandab2004:

Giant Pandas in the Wild Zhi Lü, George B. Schaller, 2002 *Giant Pandas in the Wild Saving an Endangered Species* is an insider's view of one of the most alluring and least understood animals on the endangered species list. Through photographs never before published in a book, readers enter a magical world in the remote mountainous area that is home to China's remaining 1100 wild pandas. Zhi who began her research in 1985 made the panda's habitat her second home and gained the trust of more than 20 of these animals. Her observations and photographs dispel the popular myths about pandas and draw attention to the dedication required to save the panda from almost certain extinction. **A Chance for Lasting Survival** Pan Wenshi, 2014-03-04 From 1984 through 1995 a small band of ecologists led by Pan Wenshi from Peking University conducted a study of wild giant pandas in the Qinling Mountains of Shaanxi Province. This project was the first Chinese led conservation project in China and was conducted during a significant transition period in Chinese history as the country opened its society and science to the world. The project focused on behavioral observation of wild giant pandas but evolved to include physiology, nutrition, ecology, land use, policy, and population biology as the staff became more aware that the issues with captive pandas, assisted reproduction, unusual diet, and genetic inbreeding were not the most critical to survival of wild populations. It is evident in this work that as the scientists gained knowledge they came to see giant panda conservation as wrapped in landscape ecology and human wildlife interactions. The group was seminal in the Chinese government's enactment of a logging ban to their study area by advocating for pandas at the national level. The project was summarized in a 2001 volume but its publication in Mandarin limited its influence on the greater conservation community. This English version of the original work translates, condenses, and refines the original volume with added contextual chapters on the importance of this volume and how our understanding of giant panda conservation is shaped by this pioneering field work.

Wildlife Ethics Clare Palmer, Bob Fischer, Christian Gamborg, Jordan Hampton, Peter Sandoe, 2023-08-08 *Wildlife Ethics* A systematic account of the ethical issues related to wildlife management and conservation. *Wildlife Ethics* is the first systematic book-length discussion of the ethics of wildlife conservation and management and examines the key ethical questions and controversies. Tackling both theory and practice, the text is divided into two parts. The first describes key concepts, ethical theories, and management models relating to wildlife; the second puts these concepts, theories, and models to work, illustrating their significance through detailed case studies on controversies in wildlife management and conservation. The book explores pressing topics including human responsibilities due to climate change, tradeoffs when managing zoonotic disease risks, the ethics of the wildlife trade, culling non-native species, indigenous wildlife use, and zoo-based conservation programs. Readers are encouraged to explore different ways of valuing wild animals and their practical implications. This essential text explains and explores relationships between valuing biodiversity, human utility, ecosystems, species, and animal welfare. Describes established approaches to wildlife management such as sustainable use and emerging concepts such as

compassionate conservation Discusses key ethical theories including utilitarianism ecocentrism and animal rights Offers a practical model of how to analyze ethical issues in wildlife management and conservation Wildlife Ethics The Ethics of Wildlife Management and Conservation is an accessible introduction to complex ethical issues making the book an important resource for students in fields such as conservation biology ecology environmental science and policy game management public health and veterinary medicine It will also be an invaluable tool for wildlife managers conservationists One Health practitioners practicing veterinarians and animal rehabilitation staff contemporary wildlife professionals and other stakeholders Pandas and People Jianguo Liu, Vanessa Hull, Wu Yang, Andrés Viña, Xiaodong Chen, Zhiyun Ouyang, Hemin Zhang, 2016-01-14 Understanding the complex relationships between humans and the natural world is essential for achieving environmental sustainability and improving human well being yet many studies are unable to reveal complex interactions and hidden trends This is the first book to synthesize the findings and approaches of long term integrated research in a model coupled human and natural system and to illustrate their applications to regional national and global scales It features a classic long term interdisciplinary research project in the Wolong Nature Reserve of China which contains one of the largest wild populations of the world famous endangered giant pandas Bringing together a team of contributors from both the natural and social sciences this book explores how a long term interdisciplinary and model system approach is essential to uncover the common patterns and mechanisms of coupled systems to develop ideas and methods for studying and managing other coupled systems and ultimately to contribute to the development of theories about coupled systems for sustainability Pandas and People will be essential reading for scholars interested in the interface of the natural and social sciences including ecologists conservation biologists environmental scientists sustainability scientists wildlife biologists forest scientists sociologists anthropologists economists and political scientists It will also be a valuable reference for policy makers natural resource managers and graduate students □□□□, 2008 **People's Republic of China Year-book**, 2006
