New Tools for Environmental Protection National Research Council, Division of Behavioral and Social Sciences and Education, Committee on the Human Dimensions of Global Change, 2002-06-13 Many people believe that environmental regulation has passed a point of diminishing returns the quick fixes have been achieved and the main sources of pollution are shifting from large point sources to more diffuse sources that are more difficult and expensive to regulate The political climate has also changed in the United States since the 1970s in ways that provide impetus to seek alternatives to regulation This book examines the potential of some of these new tools that emphasize education information and voluntary measures Contributors summarize what we know about the effectiveness of these tools both individually and in combination with regulatory and economic policy instruments They also extract practical lessons from this knowledge and consider what is needed to make these tools more effective The book will be of interest to environmental policy practitioners and to researchers and students concerned with applying social and behavioral sciences knowledge to improve environmental quality

Analytical Tools for Environmental Design and Management in a Systems Perspective Nicoline Wrisberg, Helias A. Udo de Haes, Ursula Triebswetter, Peter Eder, R. Clift, 2012-12-06 The aim of this book is to link demand and supply of environmental information in the field of Life Cycle Management The book is based on the results of the CHAINET concerted action financed by EU DGXII for the work period 1998 2000 and is intended to build bridges between the different scientific communities in the field of Life Cycle Management A structured approach is followed meaning that both demand and supply of environmental information are characterised after which the two are linked

Nudging Green: Behavioral Economics and Environmental Sustainability Pardeep Singh, Shikha Daga, Kiran Yadav, 2024-08-12 Our use or rather overuse of natural resources is having an increasingly drastic and adverse effect on the environment Behavioural economics uses the concepts

and elements of psychology and applies them in economic decision making It has been identified that behavioural economics can be used to tackle the issue of climate change by using nudges to influence people to make choices that are more eco friendly Behavioural economics also accept the presence of cognitive biases in the decision making process and one solution to reduce the biases is instigating nudges that increase the probability of making optimal decisions The book therefore provides an in depth understanding of the environmental and climatic issues and the role played by people s psychology in addressing them The book highlights cognitive biases and nudges that can be used to negate or reduce the negative impact of decision making on the environment The book provides a detailed explanation of the topic along with illustrations tables and case studies that make it easy to understand and apply the concepts The methods results and topics covered in the book will be of particular interest to readers interested in behavioural economics sustainable development environmental conservation and various biases that impact decision making and the nudges that are used and can be used to bring environment protection The main benefit that readers will derive from the book is a comprehensive understanding of behaviour biases and nudge based solutions and their potential to address major challenges faced while making decisions The book is helpful for policymakers researchers practitioners and students interested in behavioural economics biases sustainable development and environmental protection
