**Inclusion Chemistry with Zeolites: Nanoscale Materials by Design** N.

Herron, D.R. Corbin, 2012-12-06 Zeolites with their crystalline microporous structures are cordial hosts to a wide variety of guests. However, it was the abrupt and unexpected departure of one of these guests, water, from a host, stilbite, on heating which led Cronstedt in 1756 to coin the term zeolite from the Greek meaning boiling stone to describe this material. Since that time, approximately 40 different naturally occurring zeolites have been discovered on earth. Recent studies of meteorite compositions have shown that these guest host materials, e.g., sodalite, occur in other parts of the universe as well. However, it wasn't until the twentieth century that synthetic routes to zeolites and other non-aluminosilicate molecular sieves were discovered. In addition, with the development of X-ray diffraction and the various spectroscopies, better understanding of the nature of the cavities, cages, and channels of these materials has led to the industrial exploitation of their guest host properties. The world of zeolites has now expanded into a greater than 2 billion pound per year business with major applications in detergent formulations, catalysis, and as adsorbents and desiccants. Their economic impact is difficult to determine; however, the improvement in gasoline yields alone from catalytic cracking must account for hundreds of billions of dollars in increased GDP. In this volume, we have brought together a sampling of recent developments in various areas of guest host or inclusion chemistry in zeolites.

**Lifestyle Medicine** Jeffrey I. Mechanick, Robert F. Kushner, 2025-05-26 This book represents the third in a series of Springer textbooks on Lifestyle Medicine by Dr. Mechanick and Dr. Kushner. The first book focused on theory and practice concepts. The second book focused on implementation with a specific tactic of building a lifestyle medicine center. This third book focuses on scientific evidence to close research gaps, knowledge gaps, and practice gaps. The general intent is to imbue the field of lifestyle medicine with scientific evidence. The other intent is to continue advancing a culture of preventive care for chronic disease using lifestyle medicine, but again through a tactic of emphasizing science, evidence, and critical thinking. Lifestyle Medicine: Closing Research, Practice, and Knowledge Gaps is organized into three sections. In the first section, driver-based chronic disease models and other elements that pertain to lifestyle medicine are explored in terms of current levels of scientific substantiation. In the second section, educational modalities are presented that can improve awareness of scientific and experiential knowledge by healthcare professionals. Topics include innovative teaching models, web-based activities, training, and accreditation programs, and certification exams. In the third section, a variety of clinical scenarios are presented to highlight practice gaps, implementation issues where there is inadequate clinical action despite an awareness of the pertinent knowledge. The topics span critical domains that must be addressed so that lifestyle medicine can lead to favorable outcomes in people and populations at risk. These domains include alcohol and substance abuse, colitis, brain health, environmental risk, pharmacotherapy, de-escalation, routine change, socioeconomics, transculturalization, advanced analytics, home cardiac rehabilitation, digital twin technology, and a highly referenced

discussion of the lifestyle medicine ecosystem and infrastructure Care is taken to provide not only theoretical foundations but also case studies where appropriate to emphasize critical aspects In conclusion this third book on Lifestyle Medicine will complement the previous two Springer books and define a compendium of resources necessary for anyone interested in this field

James Carey, Brent Carlson, 2002 This is a patterns guide to building effective object oriented software frameworks It covers the entire range of development activities from initial requirements gathering to teamwork and documentation Systemic Change Processes: A Framework for Exploring Weight Loss and Weight Loss Maintenance Processes Within the Individual and Family Context C. R. Macchi, 2006 Despite multiple interventions and the increase of consumer spending on weight management weight loss maintenance continues to allude most people This study explores women s narratives and the ways they made meaning of their weight loss and weight loss maintenance experiences Examining the processes occurring within the individual and the family context this study investigated the potential differences between weight loss and weight loss maintenance processes A grounded theory approach guided the study design transcription coding and data analysis The results revealed four categories cycles and patterns fluctuations and thresholds defining self and contextual connections emerging from the research participants narratives describing their weight loss and weight loss maintenance experiences An analytical framework consisting of the examination of clustered categories using a multifocal lens and a toggling procedure facilitated the development of multidimensional descriptions of the women s experiences and guided the process of analysis The process of analysis was isomorphic to the process the women used to formulate their narratives The women incorporated multiple dimensions of their experiences to create narratives that described and informed their weight loss and weight loss maintenance efforts The analysis also revealed that weight loss and weight loss maintenance are multi dimensional processes The dimensions reflect both similarities and differences between the processes Some women used heroic while others used integrative efforts to lose weight Their efforts impacted the amount of overlap they experienced between the weight loss and weight loss maintenance processes Implications for further studies are presented for using the analytical framework to understand the meaning making processes occurring with weight loss and weight loss maintenance Potential clinical implications for addressing weight loss and weight loss maintenance within family and relational contexts are explained
