Nyhus, 2009-11-30 *Tigers of the World* Second Edition explores tiger biology ecology conservation management and the science and technology that make this possible In 1988 when the first edition was published tiger conservation was still in its infancy and two decades later there has been a revolution not only in what is known but how information about tigers is obtained and disseminated In the fast changing world of conservation there is a great need to summarize the vast and current state of the art to put this into historical perspective and to speculate in what yet remains to be done *Tigers of the World* Second Edition fulfills this need by bringing together in a unique way the world's leading tiger experts into one volume Despite the challenges ahead there are bright spots in this story and lessons aplenty not only for tiger specialists but large carnivore specialists conservation biologists wildlife managers natural resource policymakers and most importantly the caring public Examines the past twenty years of research from the world's leading tiger experts on biology politics and conservation Describes latest methods used to disseminate and obtain information needed for conservation and care of this species Includes coverage on genetics and ecology policy poaching and trade captive breeding and farming and the status of Asia's last wild tigers Excellent resource for grad courses in conservation biology wildlife management and veterinary programs New volume continues the classic Noyes Series in Animal Behavior Ecology Conservation and Management **DDC Retrieval and Indexing Terminology**

Defense Documentation Center (U.S.), 1975 **Captivity's Collections** Kathleen S. Murphy, 2023-10-17 Cashews from Africa's Gold Coast butterflies from Sierra Leone jalap root from Veracruz shells from Jamaica in the eighteenth century these specimens from faraway corners of the Atlantic were tucked away onboard inhumane British slaving vessels Kathleen S Murphy argues that the era's explosion of new natural knowledge was deeply connected to the circulation of individuals objects and ideas through the networks of the British transatlantic slave trade Plants seeds preserved animals and insects and other specimens were gathered by British slave ship surgeons mariners and traders at slaving factories in West Africa in ports where captive Africans disembarked and near the British South Sea Company's trading factories in Spanish America The specimens were displayed in British museums and herbaria depicted in published natural histories and discussed in the halls of scientific societies Grounded in extensive archival research on both sides of the Atlantic *Captivity's Collections* mines scientific treatises slaving companies records naturalists correspondence and museum catalogs to recover in rich detail the scope of the slave trade's collecting operations The book reveals the scientific and natural historical profit derived from these activities and the crucial role of specimens gathered along the routes of the slave trade on emerging ideas in natural history

Words and Spaces Stuart Saunders Smith, Thomas DeLio, 1989 This volume is presented as a collection of primary research materials for scholars and artists Each composer presents either a score or some form of documentation of one of his works and in an accompanying essay discusses his music in detail exploring both its aesthetic and structural premises

The purpose of this book is not to present analyses or critical evaluations of this original and diverse body of works but rather for the first time to document the major activities of recent composers working in the important hybrid media of sound text and sound installation. It is hoped that this book will mark the beginning of a general recognition of the importance of such inter media works as well as encourage future exploration of the aesthetic and structural innovations continued therein. Composers discussed include John Cage, Robert Ashley, Max Neuhaus, Alvin Lucier, and Kenneth Gaburo.

The Shared Mind Jordan Zlatev, 2008. The cognitive and language sciences are increasingly oriented towards the social dimension of human cognition and communication. The hitherto dominant approach in modern cognitive science has viewed social cognition through the prism of the traditional philosophical puzzle of how individuals solve the problem of understanding Other Minds. *The Shared Mind* challenges the conventional theory of mind approach proposing that the human mind is fundamentally based on intersubjectivity, the sharing of affective, conative, intentional, and cognitive states and processes between a plurality of subjects. The socially shared intersubjective foundation of the human mind is manifest in the structure of early interaction and communication, imitation, gestural communication, and the normative and argumentative nature of language. In this path-breaking volume, leading researchers from psychology, linguistics, philosophy, and primatology offer complementary perspectives on the role of intersubjectivity in the context of human development, comparative cognition, and evolution and language and linguistic theory.

The OM Guy Steven Needler, 2023-05-03. What are The Om? Why are they Uncreated? How can they operate outside of the structure of the Multiverse? Why are they not involved in the evolutionary cycle? In *The Om: The Uncreated Creations*, the reader will gain an understanding of what these rare entities are, their interaction with The Origin and The Source, and why they are considered to be Uncreated. In direct dialogue with *The Om*, the Author describes how The OM became uncreated, their structure, and their variants, including New Om. What random sentience is? The gaps in The Origin's structure and what The Origin is doing to fill these gaps. What constitutes a Universal Computer? How machine sentience is generated. How to take evolutionary short-cuts by increasing evolutionary content via parallel existence. Quantum latency and quantum fluidity and its functionality. Why mathematics will never be able to explain the physical universe. The role of Event Space in the uncreativity of The Om. That singular dominant sentience is the inevitable outcome. Or is it?

Lost in Space Joan D. Vinge, 1998. The Robinson family blast off into space to escape a dying Earth and find an unspoiled planet for humanity's second chance. They face many challenges, not the least of which is the new serpent in the garden, the evil Dr. Zachary Smith.

Creative Conservation P.J. Olney, G. Mace, A. Feistner, 1993-12-31. Past progress and future challenges. R.J. Wheater, Royal Zoological Society of Scotland, Edinburgh, UK. In the past two decades, much has been achieved in the sphere of breeding endangered species, and we should be pleased that our cooperative efforts have already borne so much fruit. However, on balance, and despite the best efforts of conservationists, the position of wildlife in the wild places where they are best conserved has become worse, often dramatically worse. Before returning to the United

Kingdom in 1972 I was in Uganda for 16 years most of which time was spent as Chief Warden of Murchison Falls National Park Our main problem was that an over population of large mammals was having a devastating impact on the habitat Devastation was being wrought on woodland areas by the arrival of large numbers of elephants into the sanctuary of the Park following changes in land use in the areas outside the Park These changes were in response to the requirements of an ever expanding human population

One of the significant advantages of Space Captive books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast
