The Deep Space Network As an Instrument for Radio Science Research National Aeronautics and Space Administration (NASA), 2018-07-16 Radio science experiments use radio links between spacecraft and sensor instrumentation that is implemented in the Deep Space Network

The deep space communication complexes along with the telecommunications subsystem on board the spacecraft constitute the major elements of the radio science instrumentation. Investigators examine small changes in the phase and or amplitude of the radio signal propagating from a spacecraft to study the atmospheric and ionospheric structure of planets and satellites, planetary gravitational fields, shapes, masses, planetary rings, ephemerides of planets, solar corona, magnetic fields, cometary comae, and such aspects of the theory of general relativity as gravitational waves and gravitational redshift.
