This study provides a consistent description and explanation of the syntax, the semantics, and the pragmatics of Spanish mood. A major focus of attention is the central role of the truth-functional categories of realis, potentialis, and irrealis as parameters relevant to mood selection in both subordinate and non-subordinate clauses. Furthermore, a proposal is offered for a new typology of clause embedding predicates. The framework chosen stems from the insight that complement-taking predicates share the property of providing information on the set of mental processes which characterize intentional human behavior. At the level of pragmatic analysis, mood selection is examined from a variety of angles. Thus, specific research is conducted within the framework of speech act theory, relevance theory, politeness theory, and the theory of Gricean maxims. Pragmatics in Persuasive Discourse of Spanish Television Advertising Karol J. Hardin, 2001. This investigation analyzes pragmatic ways in which Spanish is used to achieve persuasion in television advertising. The author applies pragmatic models to commercials for products and services from three countries: Chile, Spain, and the United States. She addresses the questions: 1. Which pragmatic devices occur most frequently? 2. How are these devices linguistically coded? 3. Are any differences evident between regional varieties of Spanish? and 4. How are pragmalinguistic features of television advertising used to effect persuasion? The most representative variables include speech acts, indexicals, politeness implicatures, violations of Grice's Maxims, and speaker considerations. The study contributes to the cross-linguistic understanding of pragmatics and of persuasion in Spanish by: 1. offering a procedure that may be replicated; 2. addressing multiple pragmatic categories; and 3. examining the relationship between pragmatic strategies and persuasion among Spanish speakers. Given the vital role of the media in society, Spanish television advertising reflects the pragmatic communication of persuasion by and to Spanish speakers. *Pragmática de discurso persuasivo de publicidad de televisión en español*. Gutiérrez-Rexach, 2022-02-22. An area of linguistic research can be considered mature when the validity of theoretical and empirical results is tested cross linguistically and when predictions from different languages influence and modify the course of theoretical development. The semantics/pragmatics interface poses a special challenge in this respect because of its interdisciplinary and multi-theoretical nature. This volume attempts to bridge the gap between theory and empirical analysis by focussing on several aspects of the semantics and the pragmatics of Spanish from a variety of theoretical points of view. Some of the papers were selected from those presented at the International Conference Semantics and Pragmatics of Spanish, Ohio State University, 1999. Others are invited contributions from leading scholars in the field. Among the topics covered are several that have been the subject of intense debate, whereas others represent subtle data patterns not considered so far. The topics include: the proper characterization of tense and aspect; the subjunctive verbal periphrases; stage individual level predication; the interpretation of infinitives in embedded and adjunct clauses; the subjunctive mood; demonstratives; quantification of excess/exception phrases; binding phenomena; propositional negative polarity items; particles of politeness and pronominal doubling. Overall, the analysis of these subjects contributes new findings to prominent theories in the field, such as possible world semantics, relevance theory, mental spaces, type coercion, generalized quantifier theory, dynamic semantics, and the theory of logical form. *Pragmatics of the Interaction Patterns in a Spanish Court* Marta

Part I explores macrosocial factors such as region, gender, age, and social class, while Part II focuses on microsocial and situational factors. Part III concludes the volume with theoretical and methodological contributions to the field. This volume will be of particular interest to advanced students and researchers of Spanish and Linguistics.

The modal verbs can and may in English and Spanish Andra Stefanescu,2008-05-28 Diploma Thesis from the year 2007 in the subject English Language and Literature Studies Linguistics grade 1 University of Bucharest Faculty of Foreign Languages and Literatures language English abstract Modality is a semantic concept that covers notions such as possibility probability permission ability volition necessity and obligation The class of modals is in many languages both syntactically and semantically highly irregular and unpredictable modals frequently have idiosyncratic conjugational patterns and are subject to highly specialized syntactic rules One of the main characteristic of modal verbs is their relatively imprecise and indeterminate meaning their ambiguity the same modal can be deontic i e based on rules and regulations but it may also involve processes sets of knowledge or belief systems and thus get an epistemic interpretation In order to define the class of modals or to provide a set of environments in which a modal may be correctly or appropriately used one must refer to many levels of language the purely syntactic environment as well as the logical structure the context of the utterance the assumptions that are shared by the speaker and the addressee the social situation assumed by the participants in the discourse the impression the speaker wants to make on the addressee and so on There is also the question of the appropriate context environments that is the semantic pragmatic issue Therefore a complete analysis of a particular modal can only be achieved by looking both at its syntactic features and at its semantic structure in other words the syntax of a modal verb is
